

# MANULA DE INTALACION DE CENTOS

ANDRES GERONIMO PARRA AVELLANEDA  
NICOLAS DAVID CASTRO ZORRILLA  
WILMAR DAVID MACIAS GUERRERO

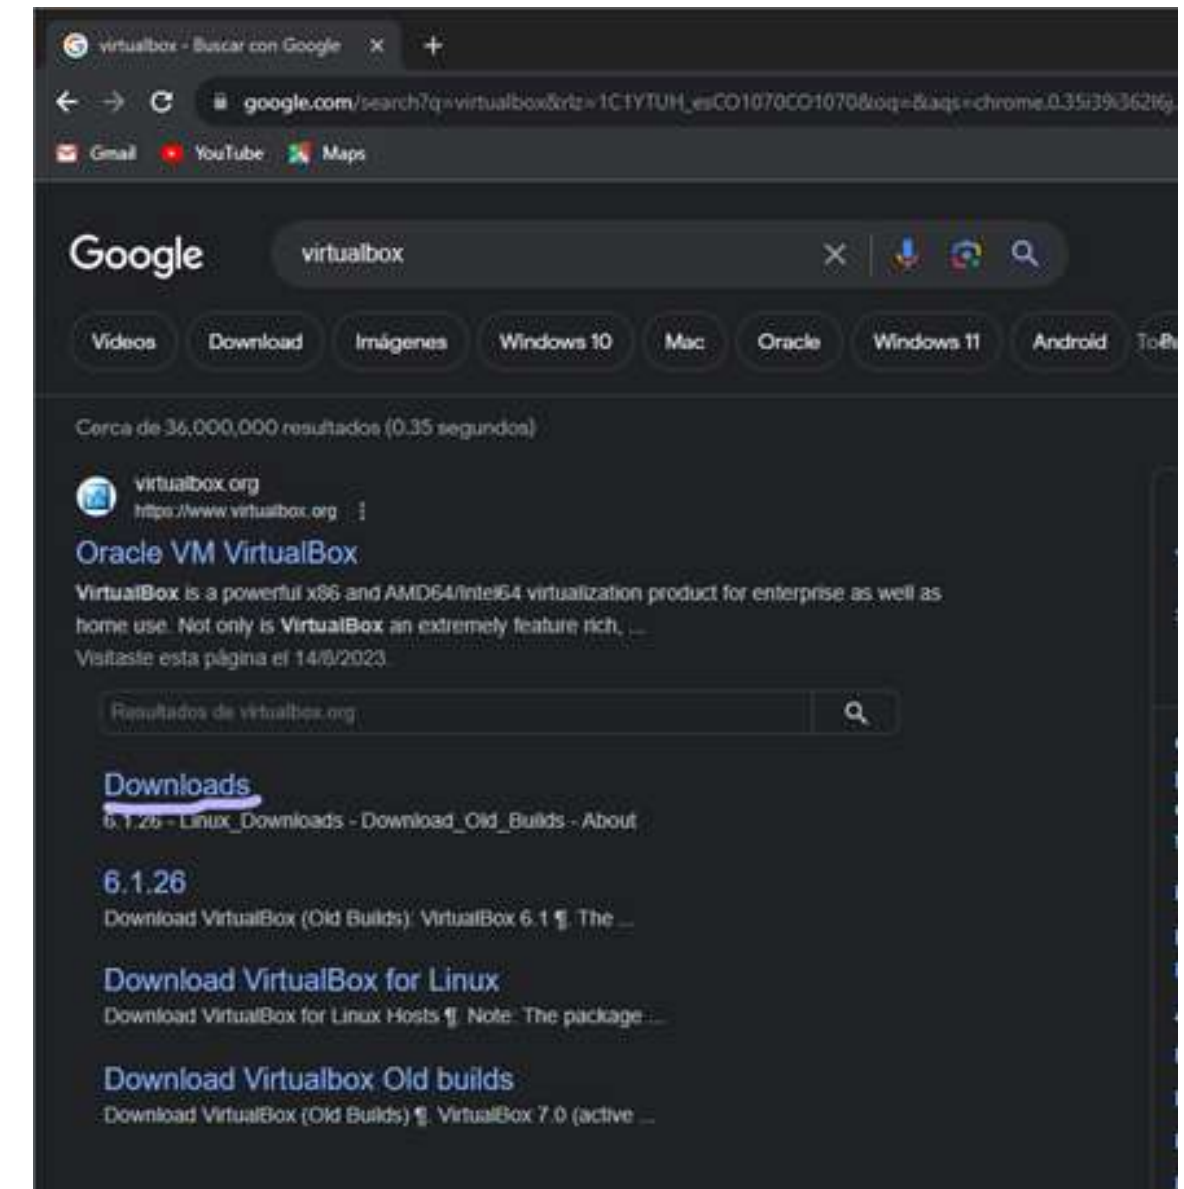

---

# Ingresamos al navegador

# Buscamos VirtualBox, Seleccionamo s la opción (Downloads)

# Vamos al apartado que dice (Windows host)

The screenshot shows the VirtualBox website with a blue header. On the left is a sidebar with links: About, Screenshots, Downloads, Documentation (with sub-links for End-user docs and Technical docs), Contribute, and Community. The main content area has the VirtualBox logo and a search bar. Below the logo is a 'Download VirtualBox' section with text about finding binaries and source code. It includes a 'VirtualBox binaries' section with a license agreement and a link to 'VirtualBox 6.1 builds'. There is also a 'VirtualBox 7.0.10 platform packages' section with a bulleted list of operating systems: Windows hosts, macOS / Intel hosts, Linux distributions, Solaris hosts, and Solaris 11 IPS hosts. At the bottom, it mentions the GPL version 3 license and provides a link to the changelog. A note at the very bottom advises comparing checksums for package integrity.

## Download VirtualBox

Here you will find links to VirtualBox binaries and its source code.

### VirtualBox binaries

By downloading, you agree to the terms and conditions of the respective license.

If you're looking for the latest VirtualBox 6.1 packages, see [VirtualBox 6.1 builds](#). Version 6.1 will remain supported until December 2023.

### VirtualBox 7.0.10 platform packages

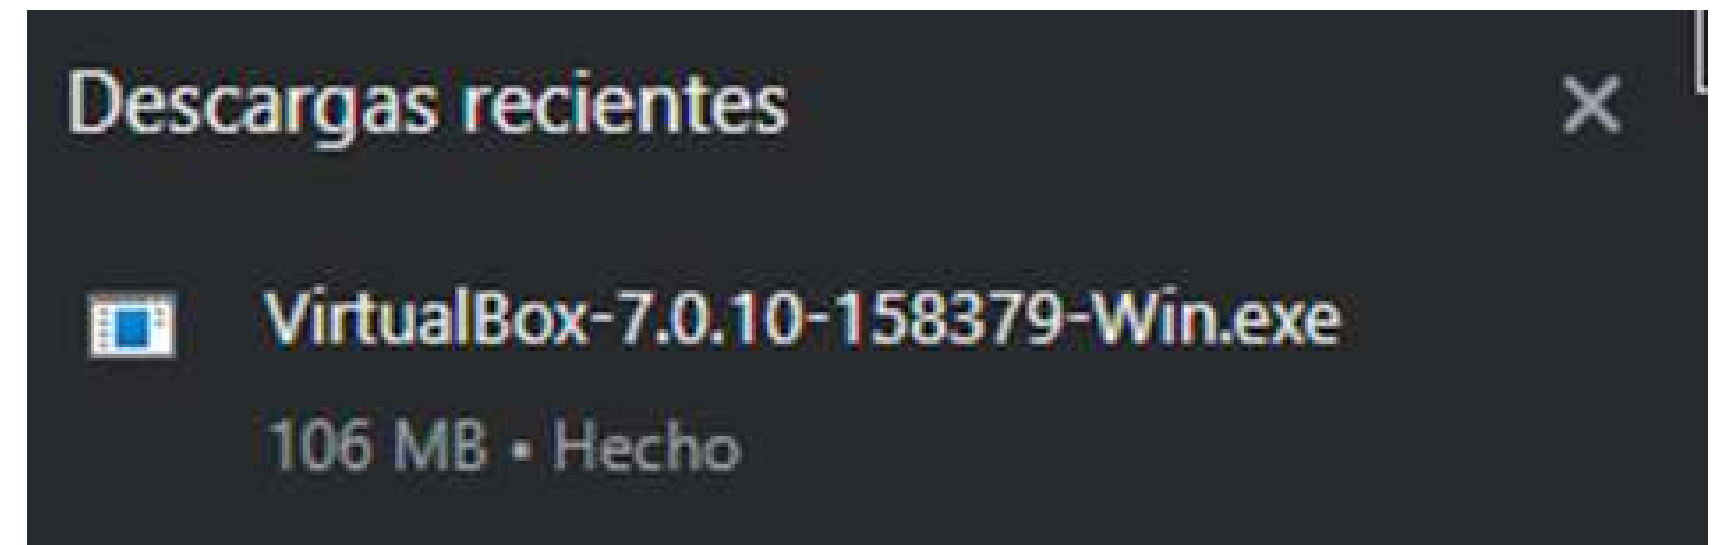

- [Windows hosts](#)
- [macOS / Intel hosts](#)
- [Linux distributions](#)
- [Solaris hosts](#)
- [Solaris 11 IPS hosts](#)

The binaries are released under the terms of the GPL version 3.

See the [changelog](#) for what has changed.

You might want to compare the checksums to verify the integrity of downloaded packages. *The SHA256 checksums should be favored as the MD5 algorithm must be treated as insecure!*

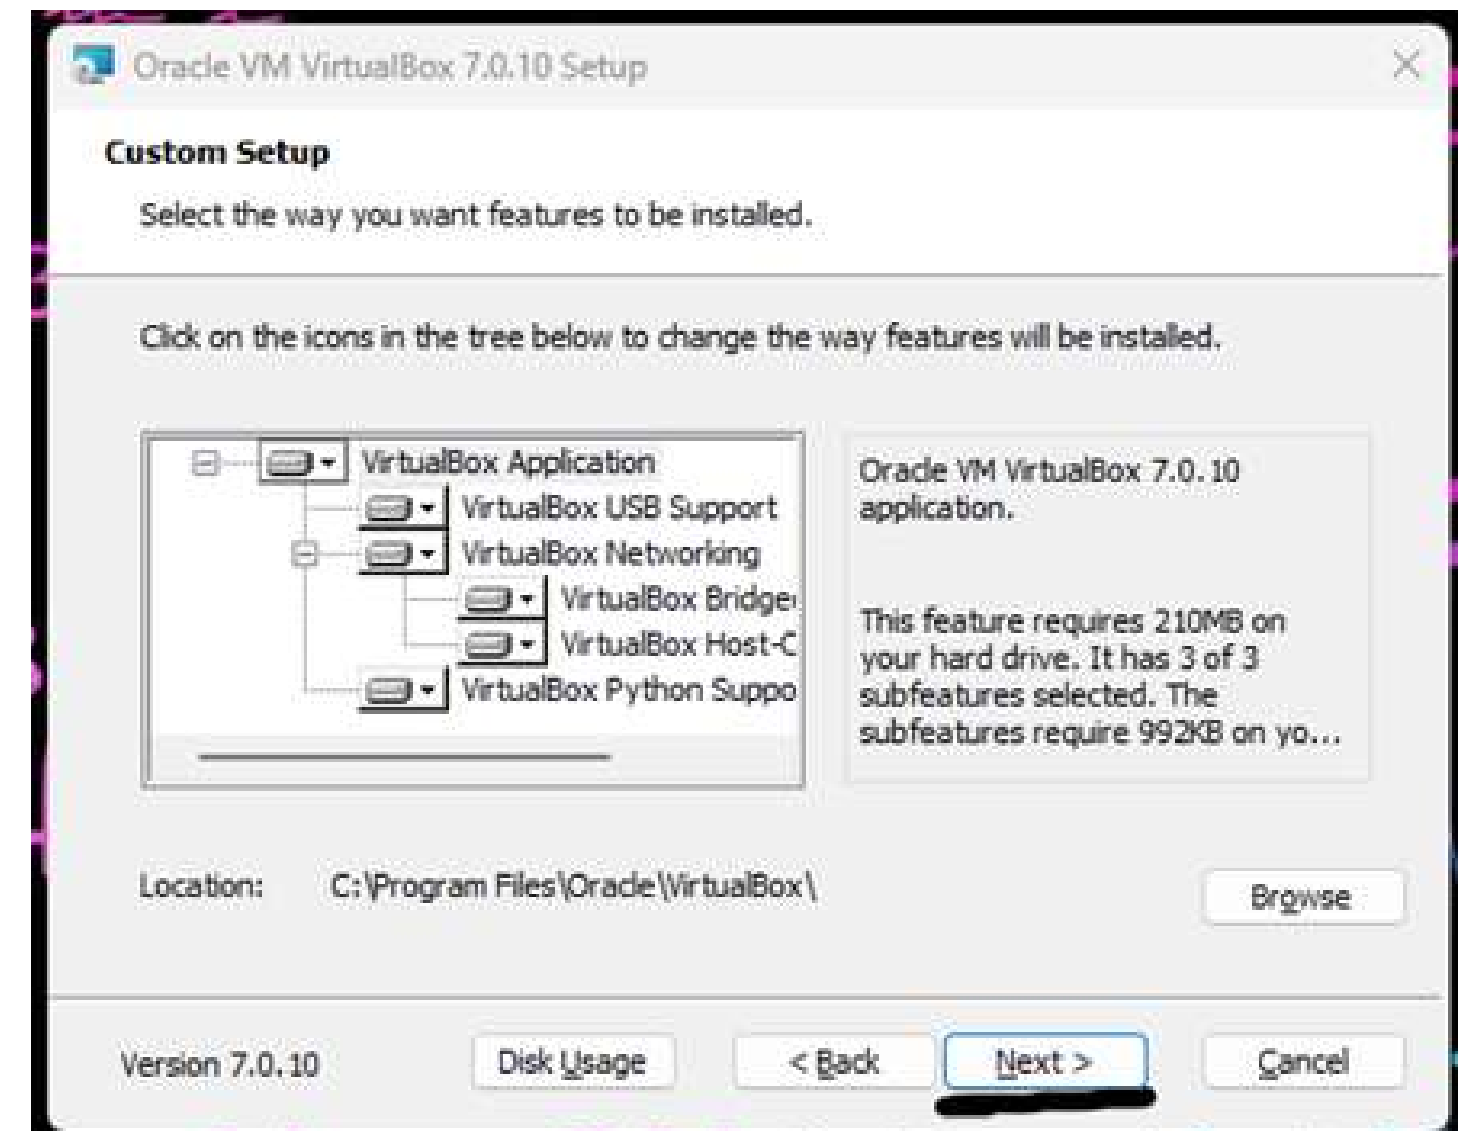

**Ya empezara  
la descarga,  
esperamos...**

**Abrimos el  
archivo .exe  
que acabamos  
de instalar y le  
damos Next**

# Le damos Next

# Le damos YES

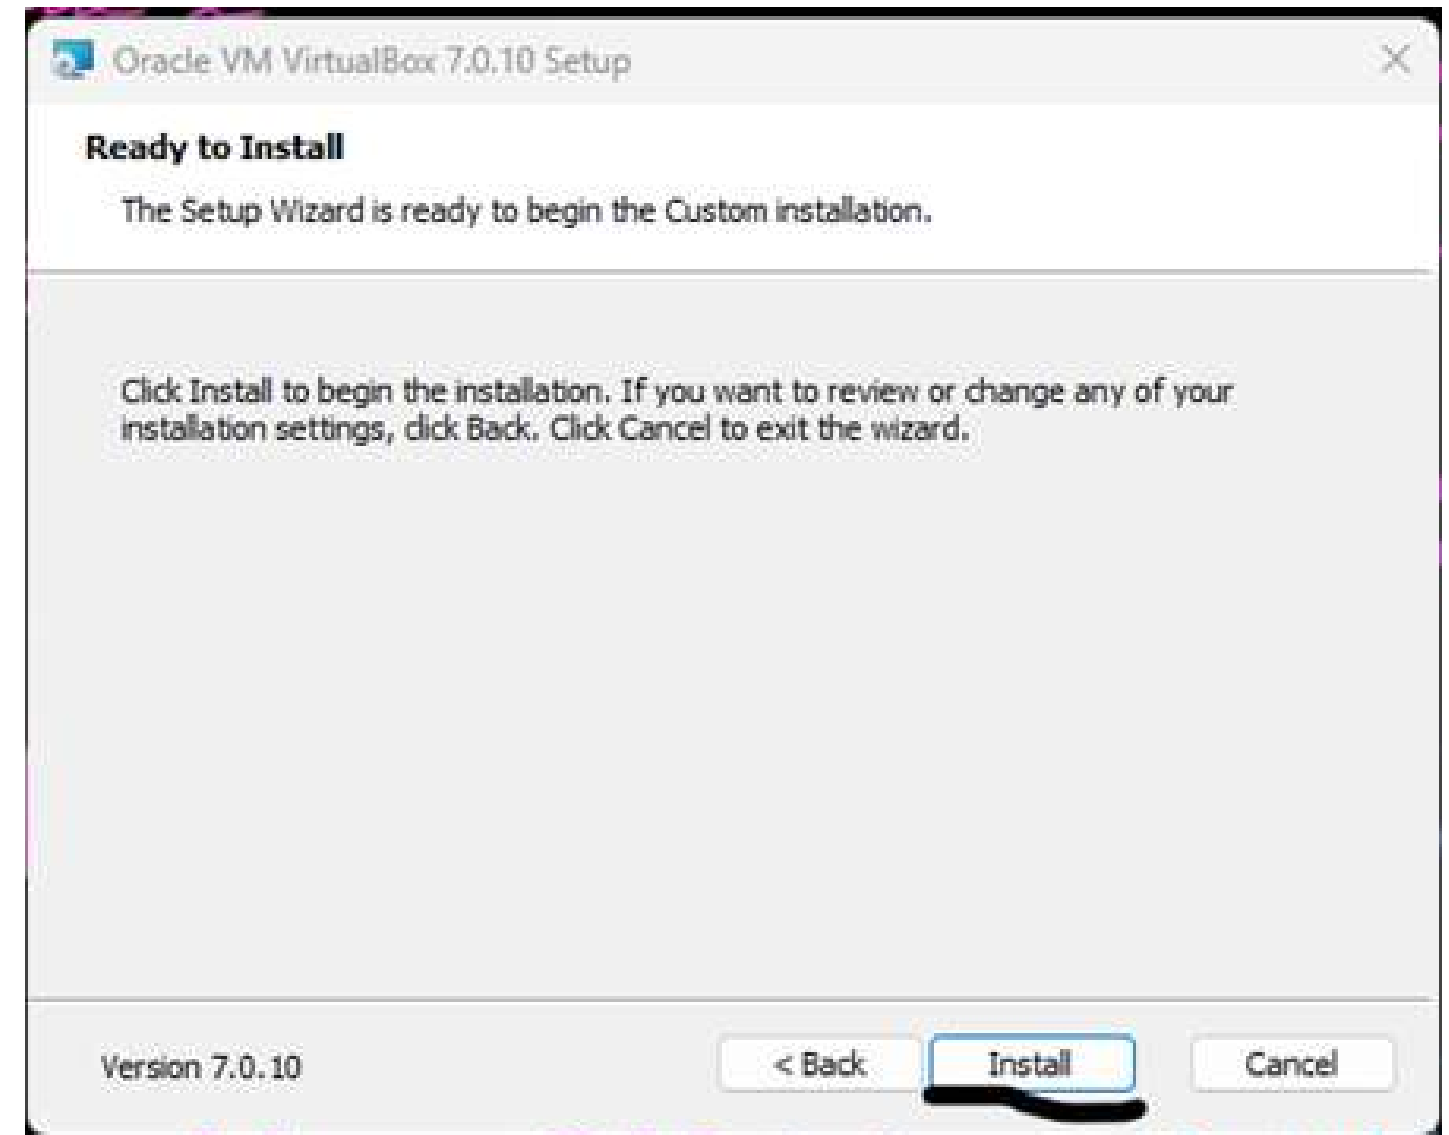

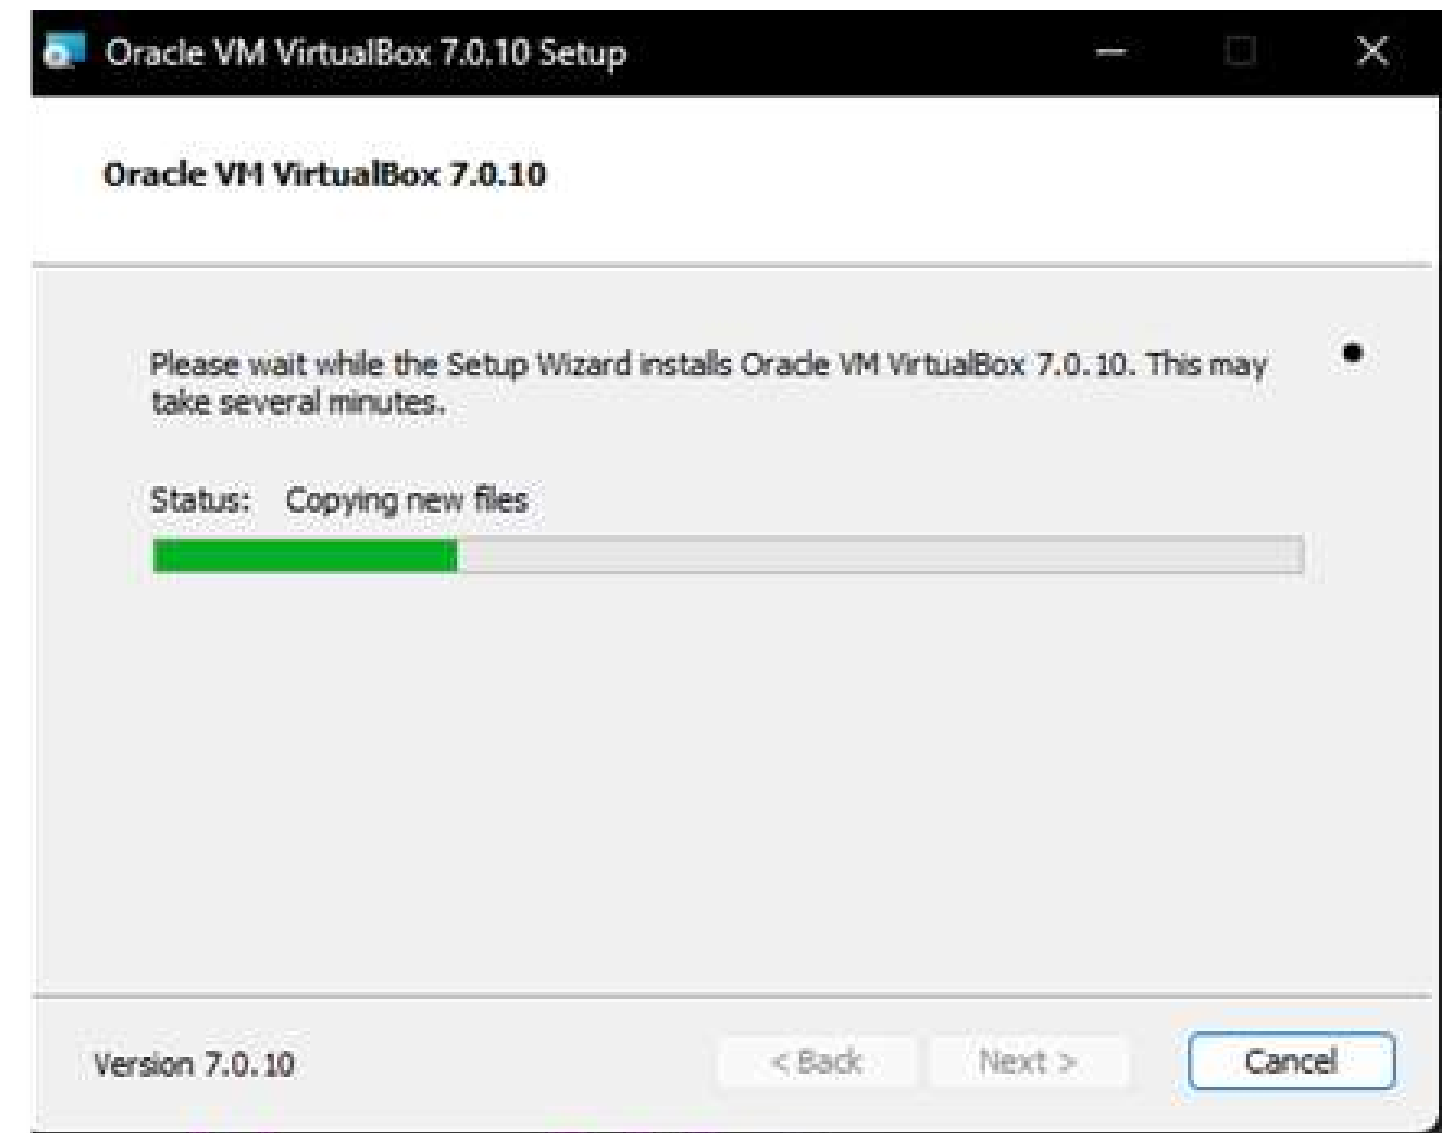

# Le damos otra ves YES

# Le damos INSTALL

# Esperamos que termine la instalación

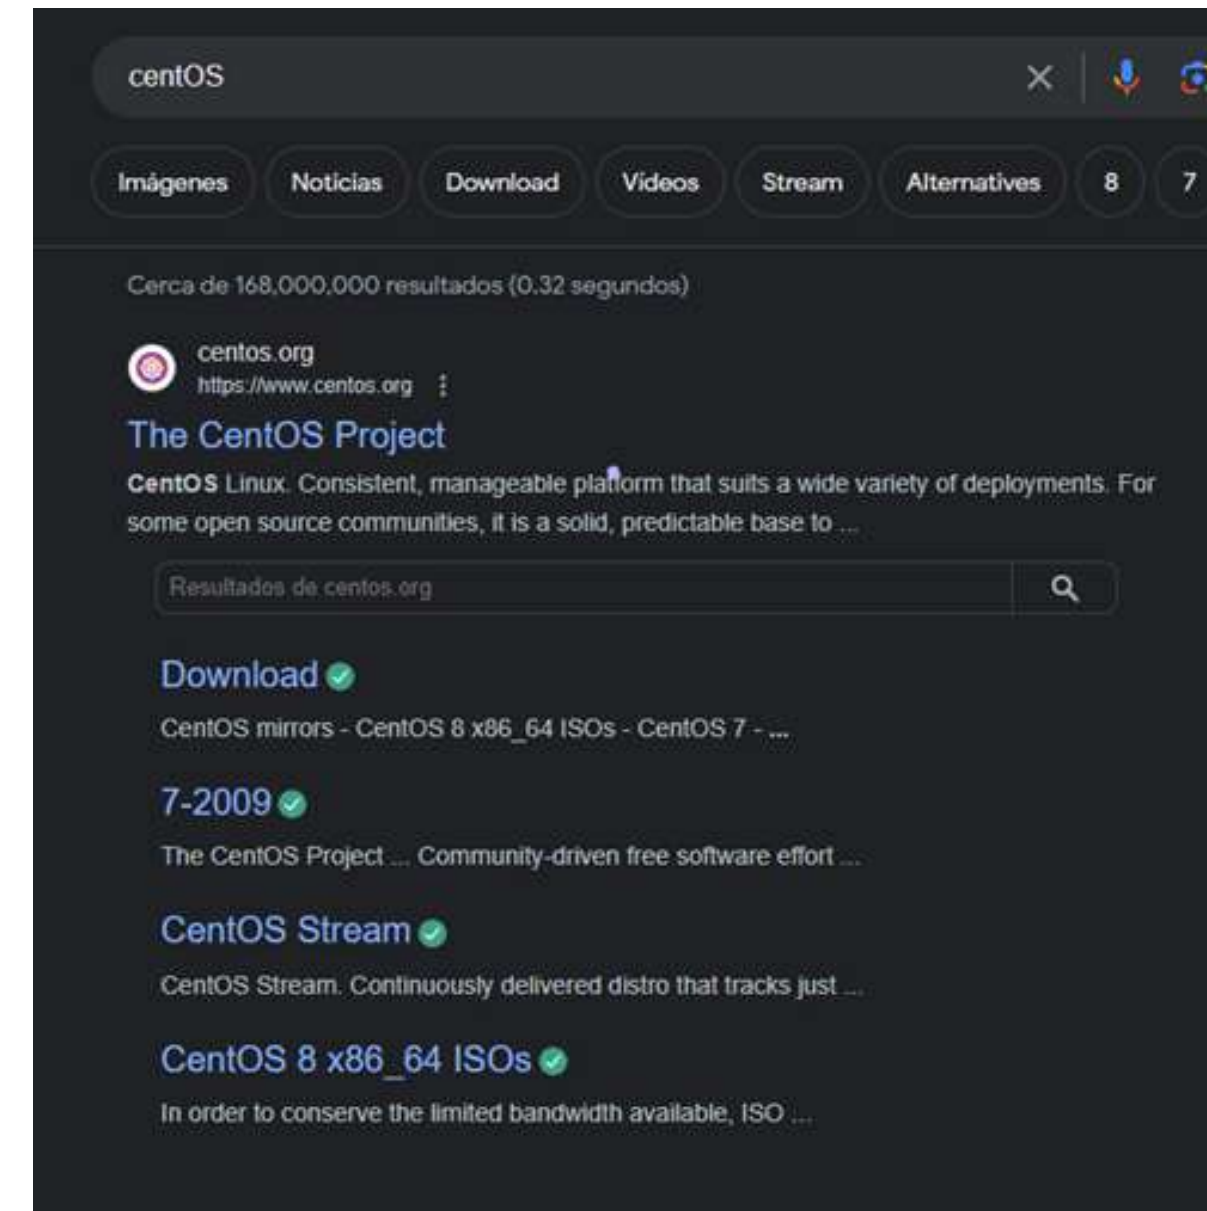

# Le damos a FINISH

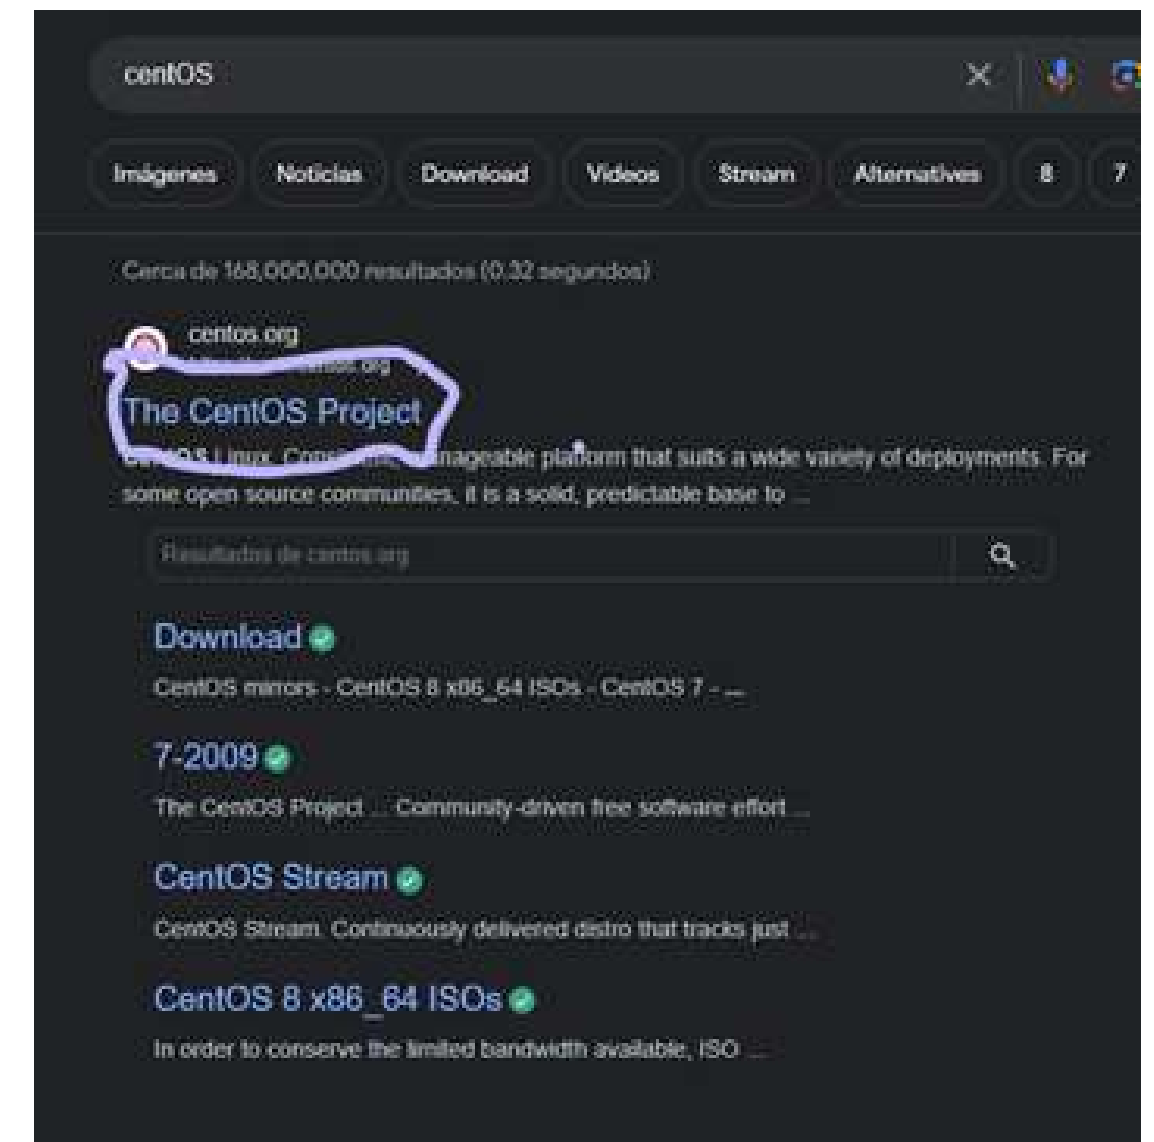

# **Ingresamos al navegador**

# Buscar en el navegador “CentOS”

# Entrar al primer link que aparece

# Darle al botón de “Descargar”

# Escoger la arquitectura de “x86\_64”

# Darle al primer Link

Para conservar el ancho de banda limitado disponible, las imágenes ISO no se pueden descargar desde [mirror.centos.org](http://mirror.centos.org)

Los siguientes espejos en su región deberían tener las imágenes ISO disponibles:

[http://edgeuno-bog2.mm.fcix.net/centos/7.9.2009/isos/x86\\_64/](http://edgeuno-bog2.mm.fcix.net/centos/7.9.2009/isos/x86_64/)

[http://mirror.unimagdalena.edu.co/centos/7.9.2009/isos/x86\\_64/](http://mirror.unimagdalena.edu.co/centos/7.9.2009/isos/x86_64/)

Otros espejos más alejados:

# Ya empieza la descarga

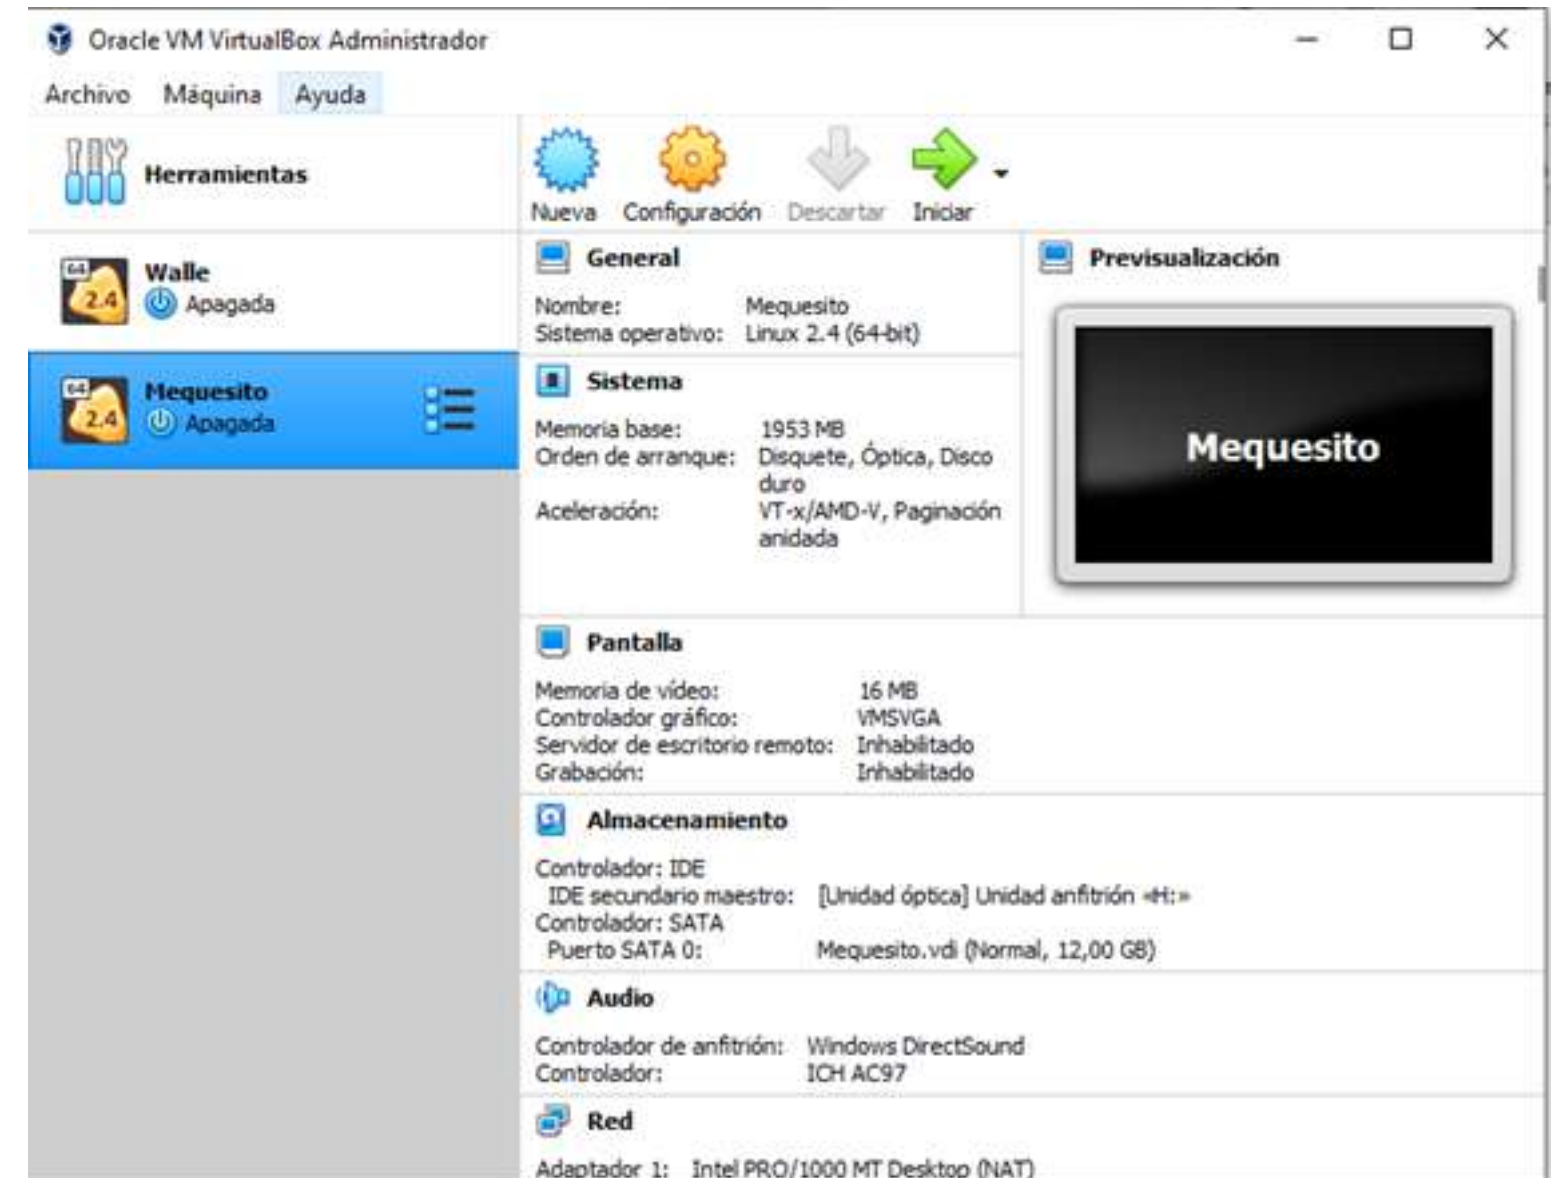

Descargas recientes

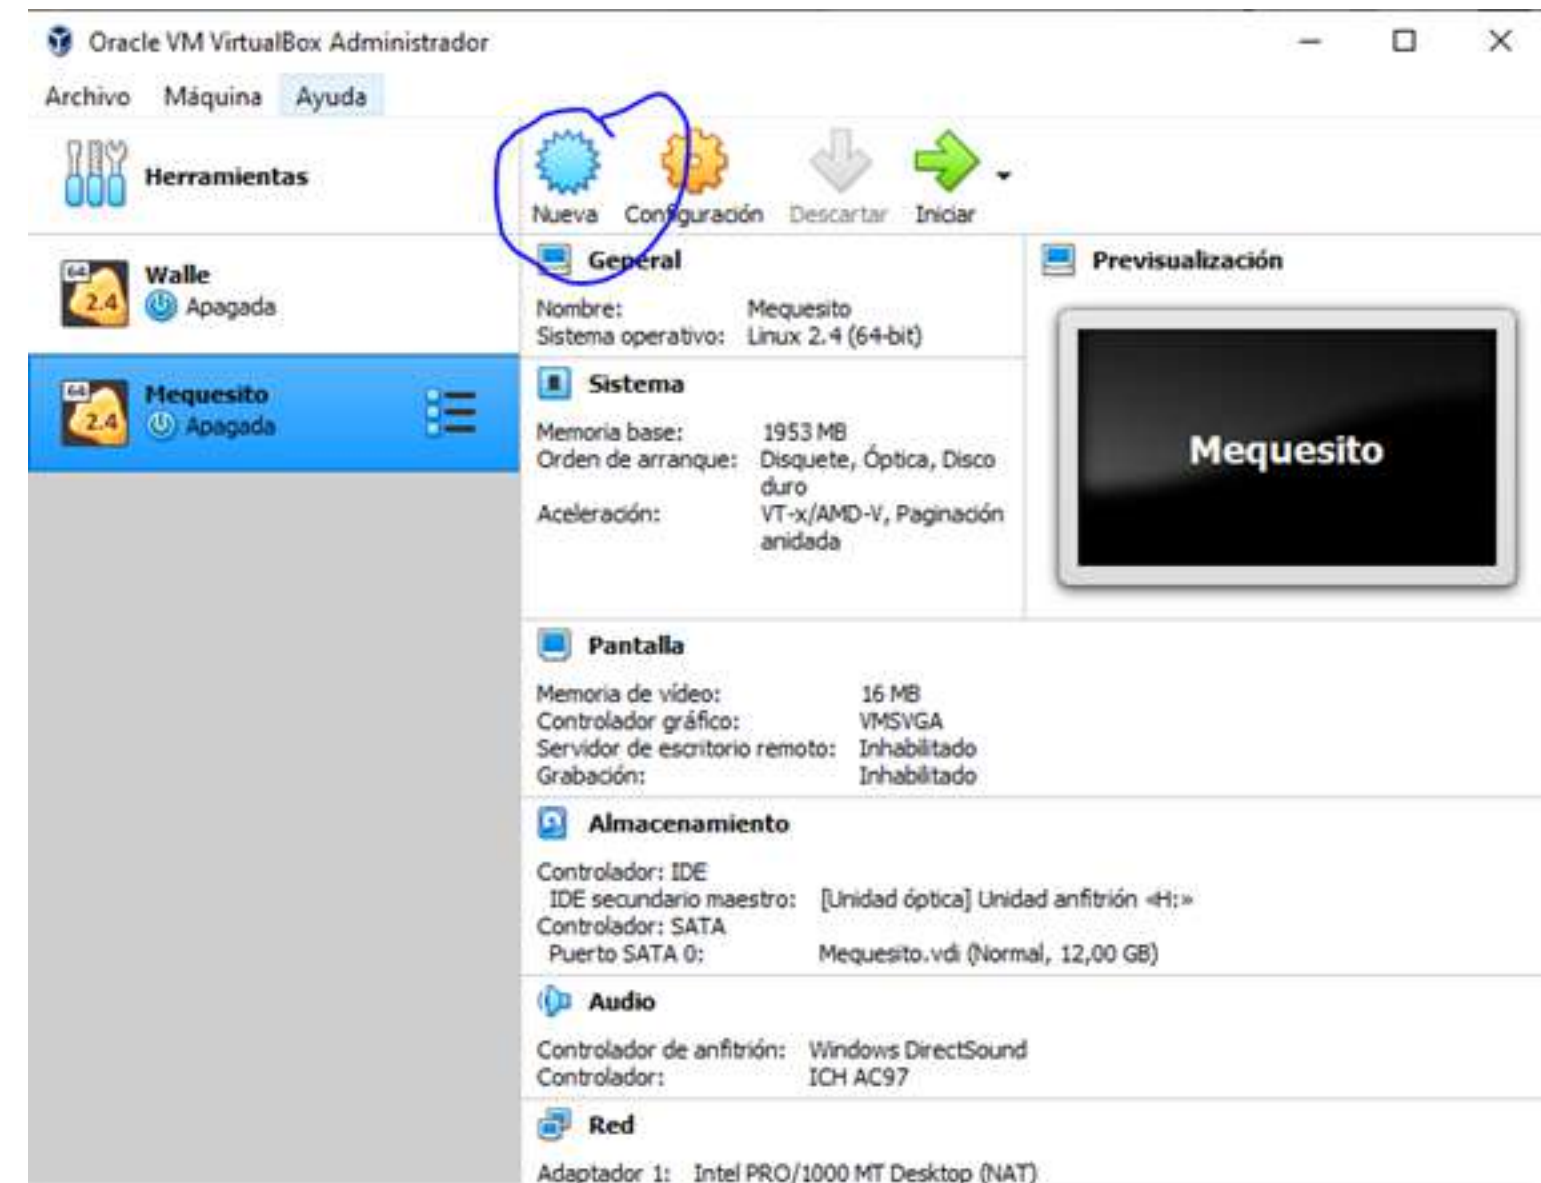

CentOS-7-x86\_64-DVD-2009.iso

↓ 0,1/4,4 GB • Quedan 17 minutos

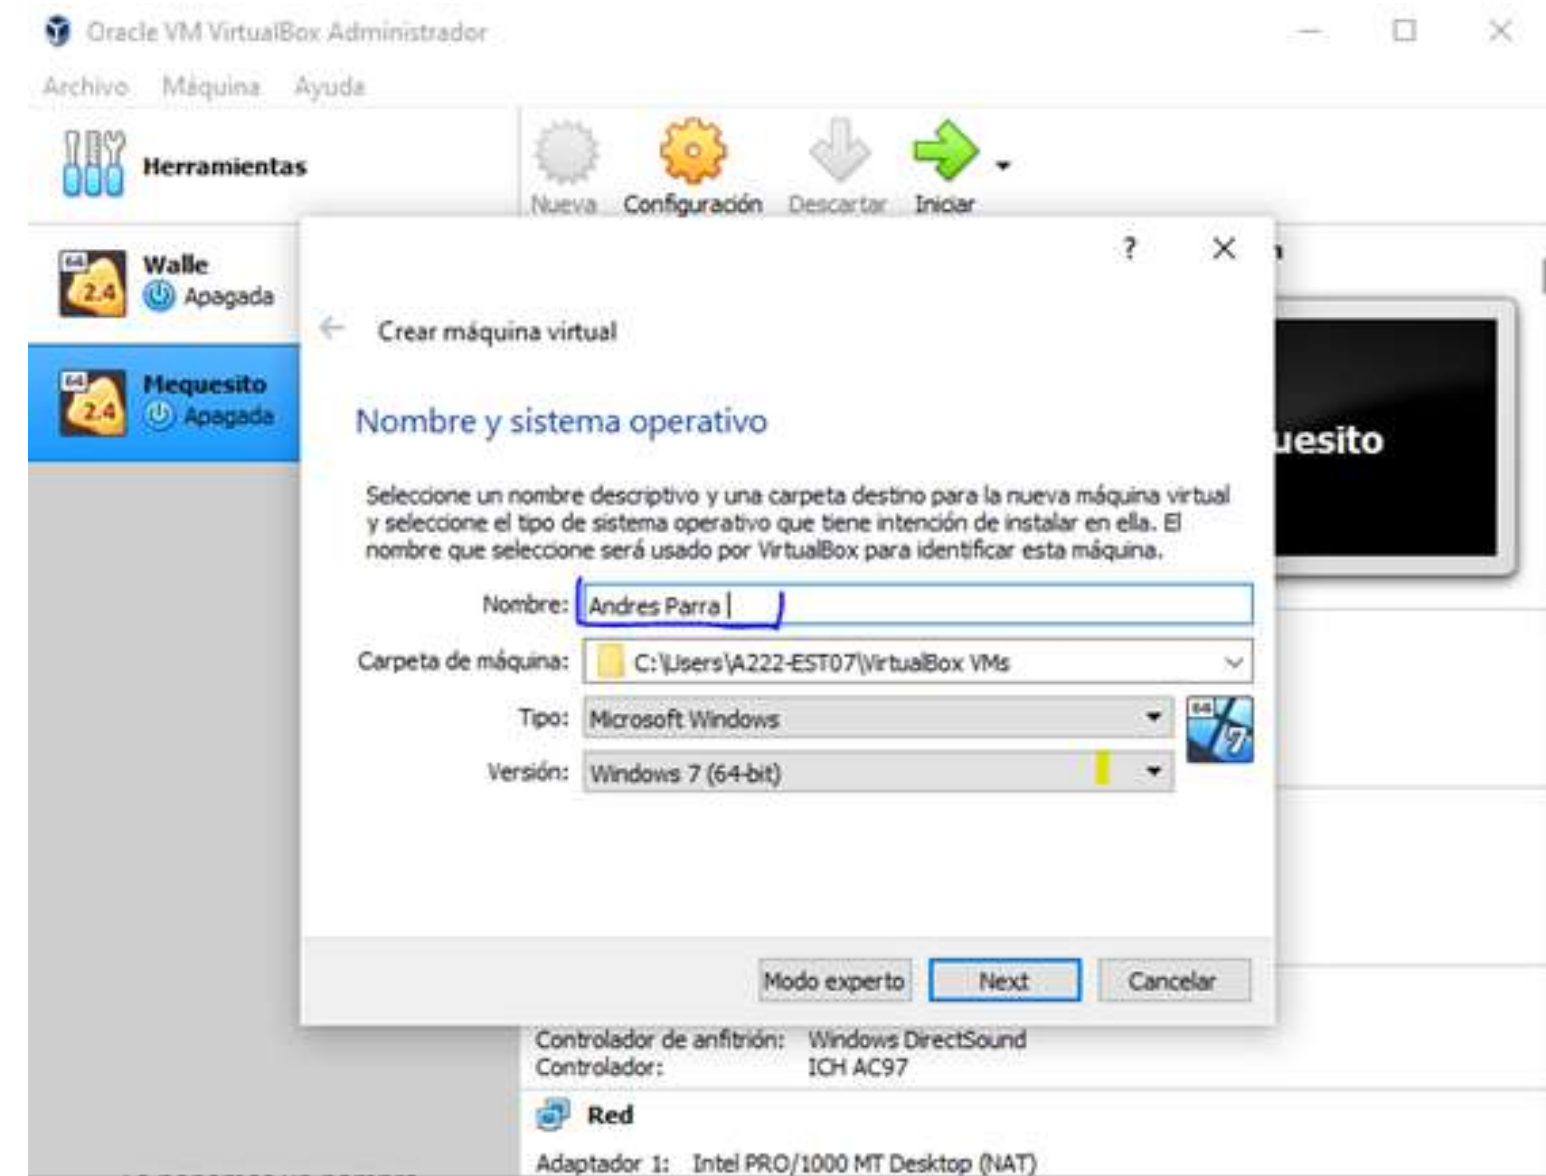

# Ingresamos a virtual box

# Le damos en la opción de Nuevo

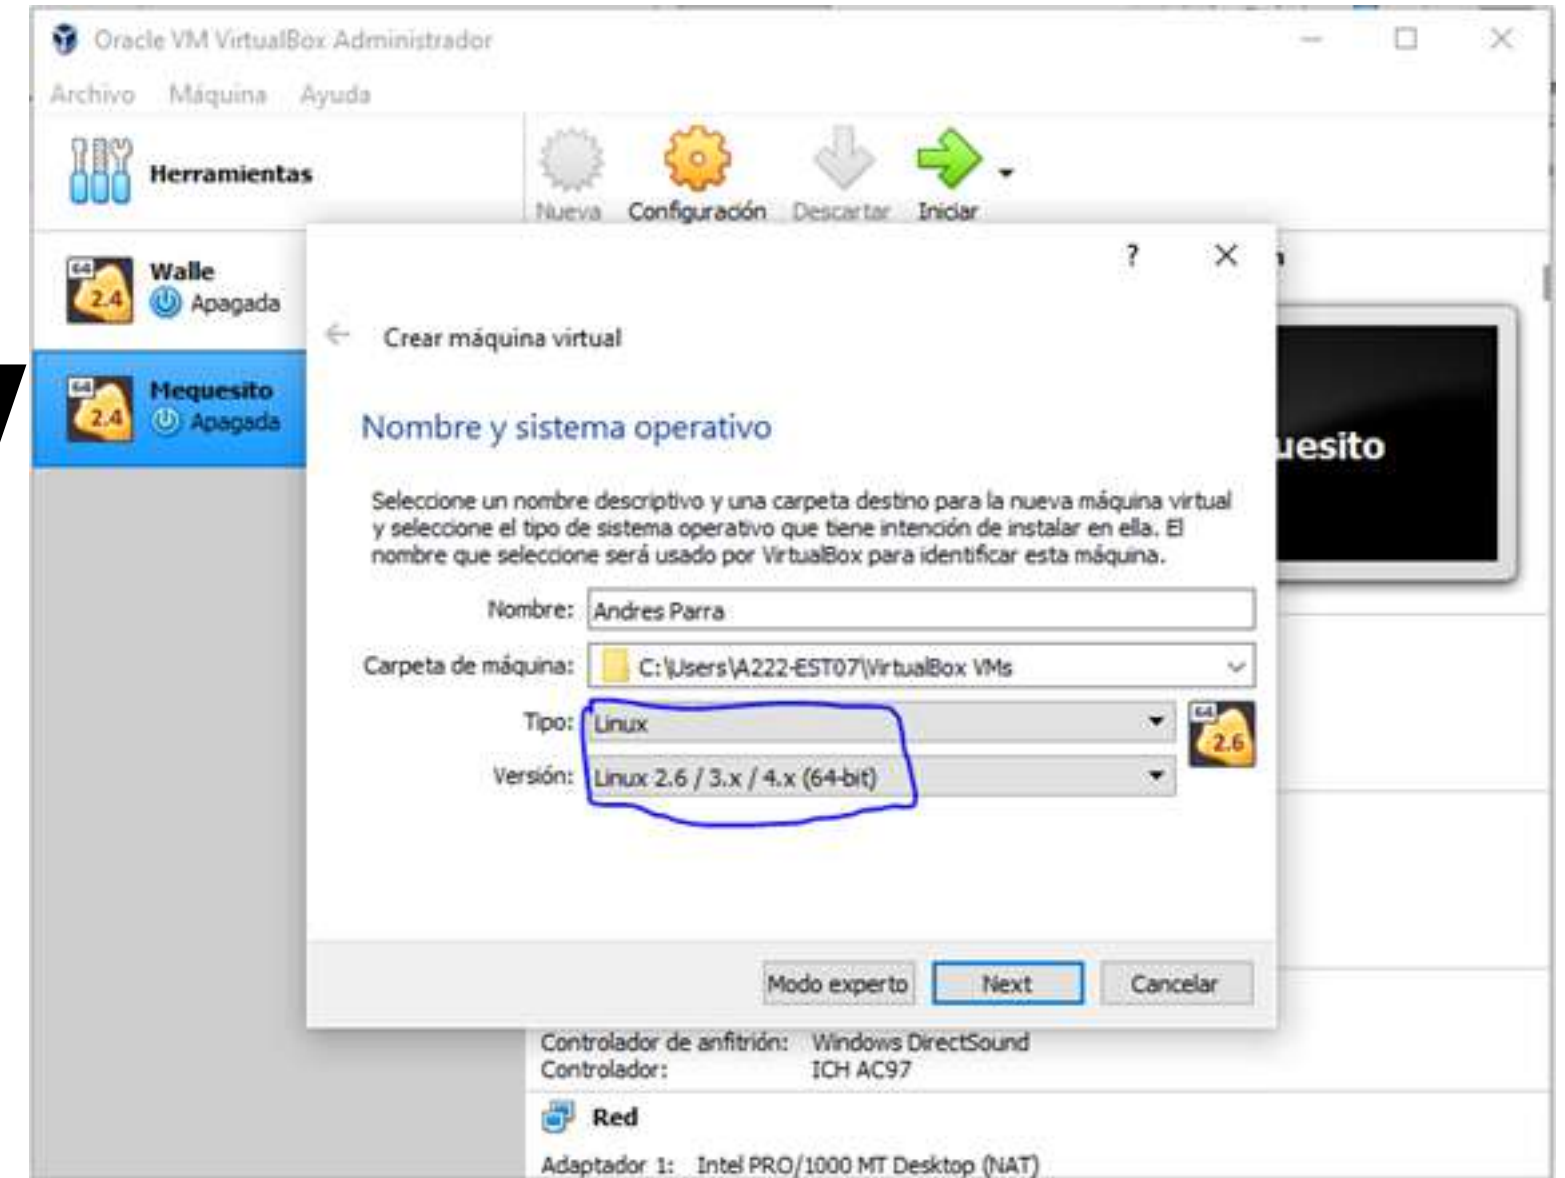

# Le ponemos un nombre

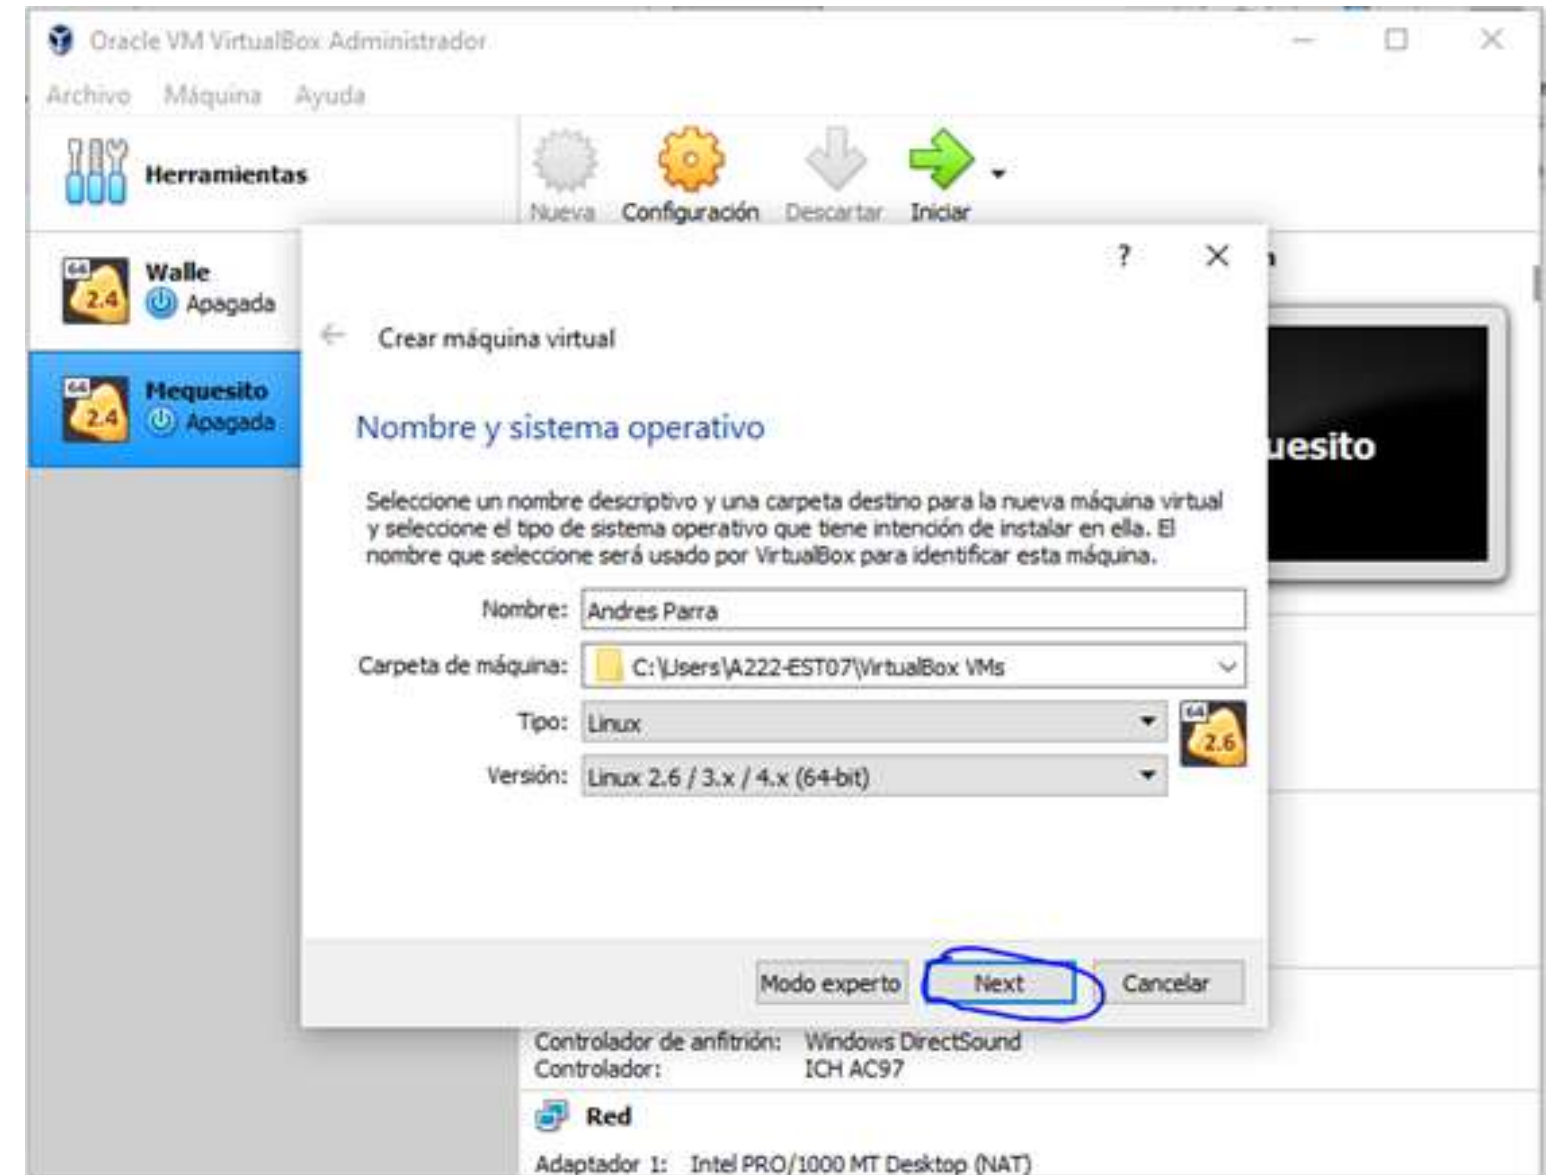

# Ponemos el tipo de Linux y la versión de Linux 64bits

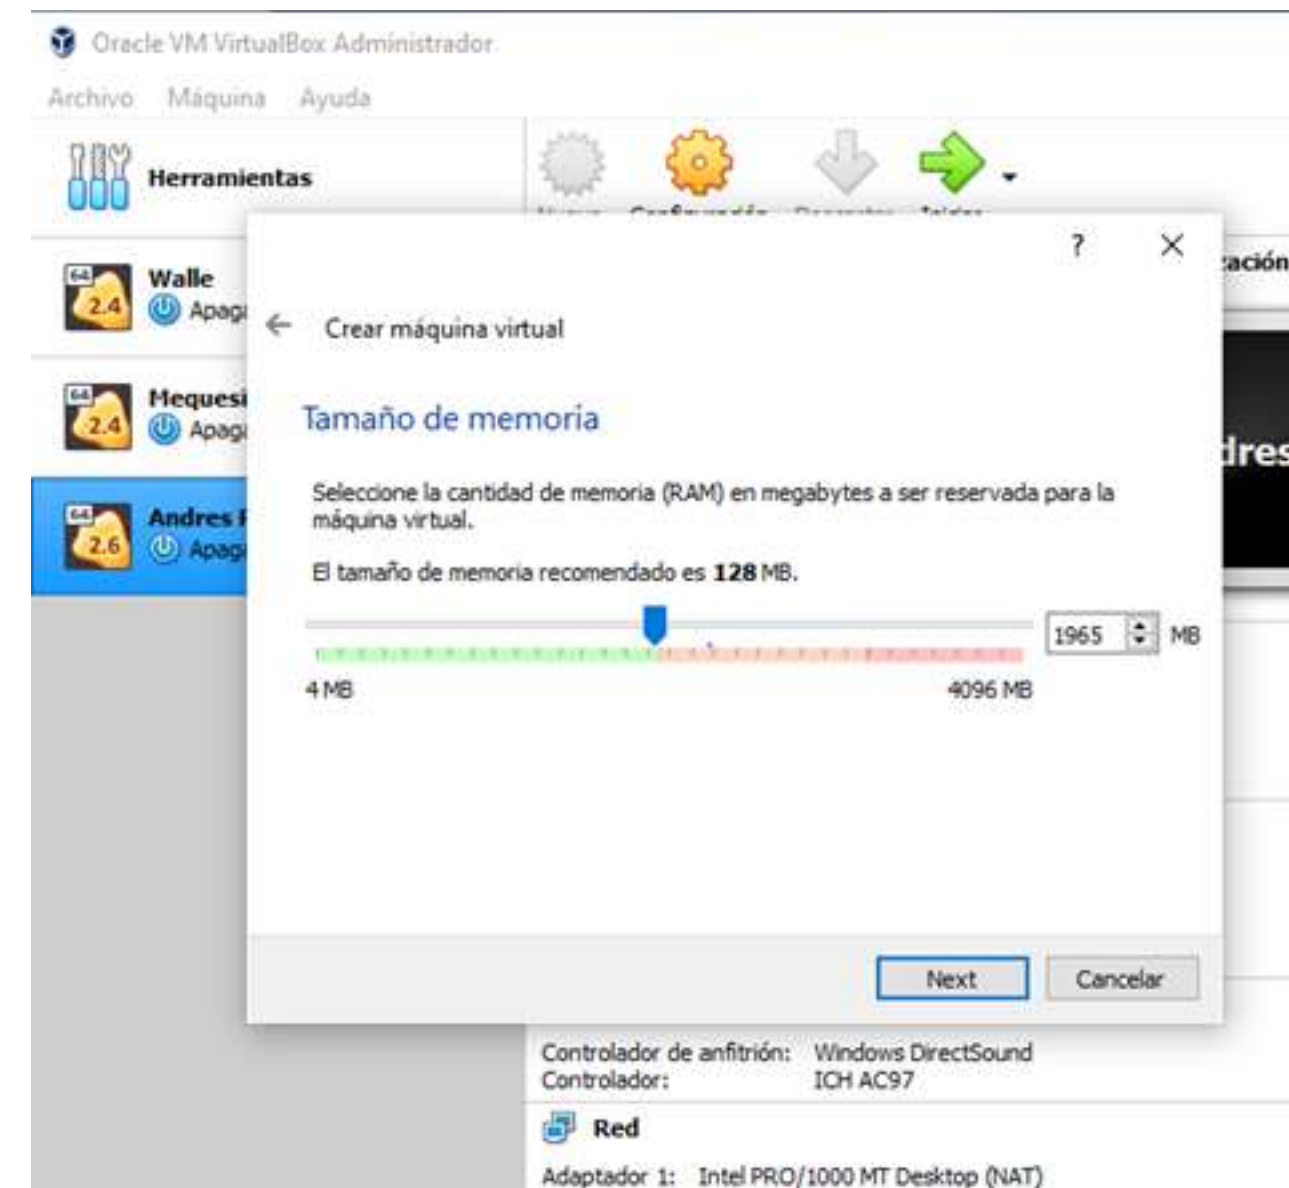

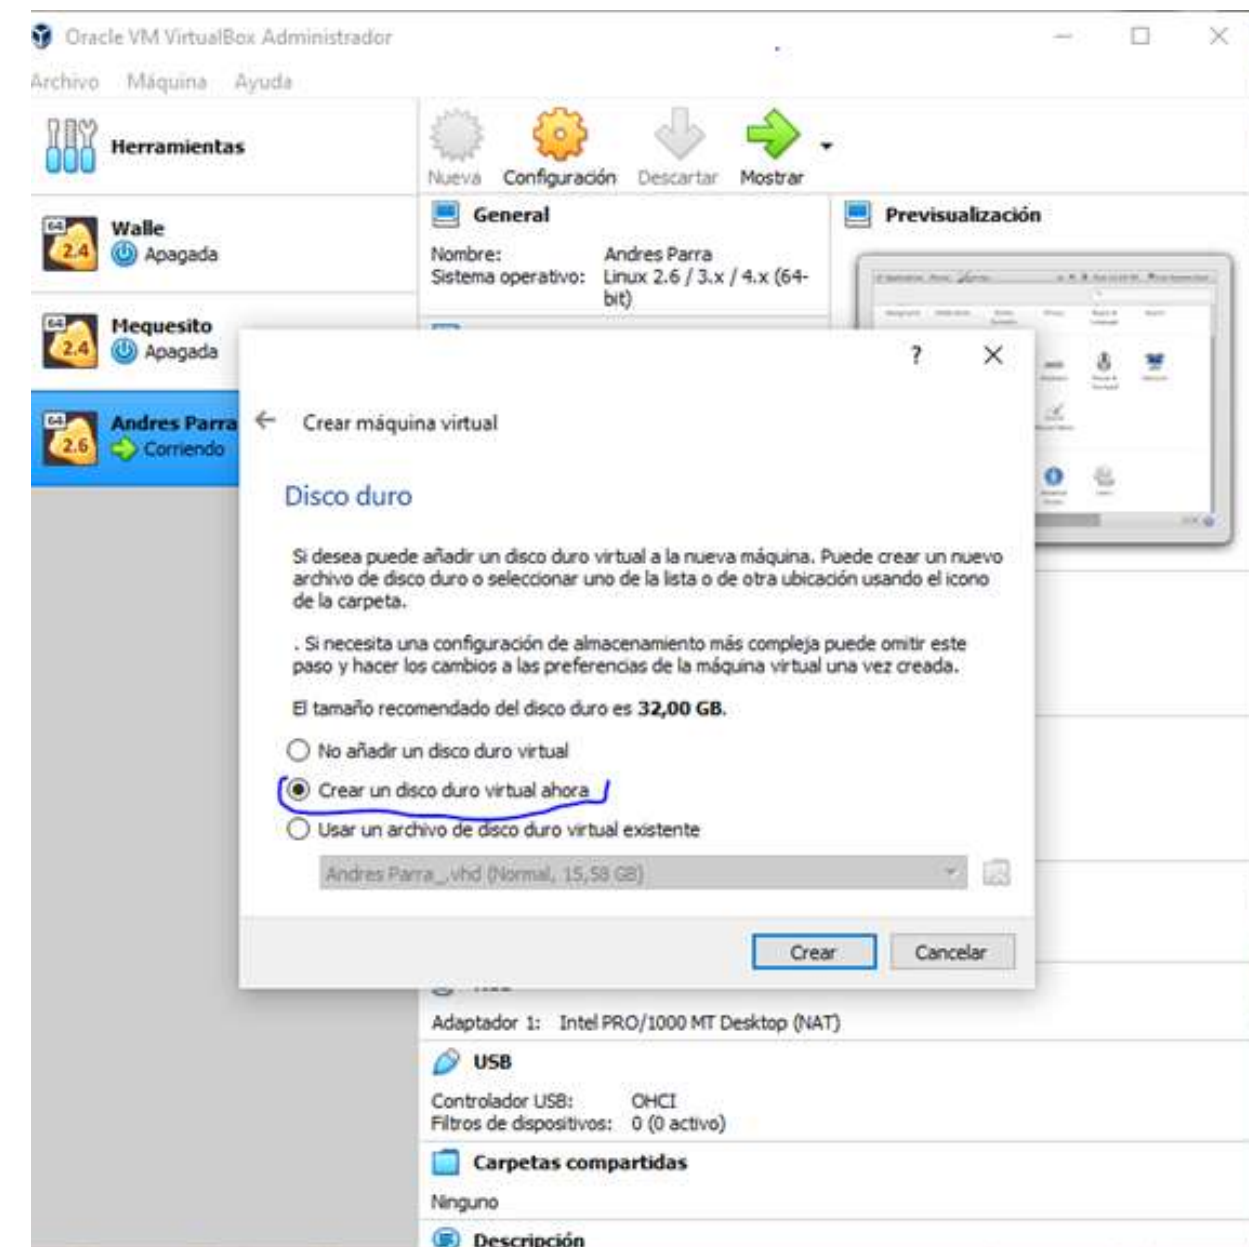

# Le damos Next

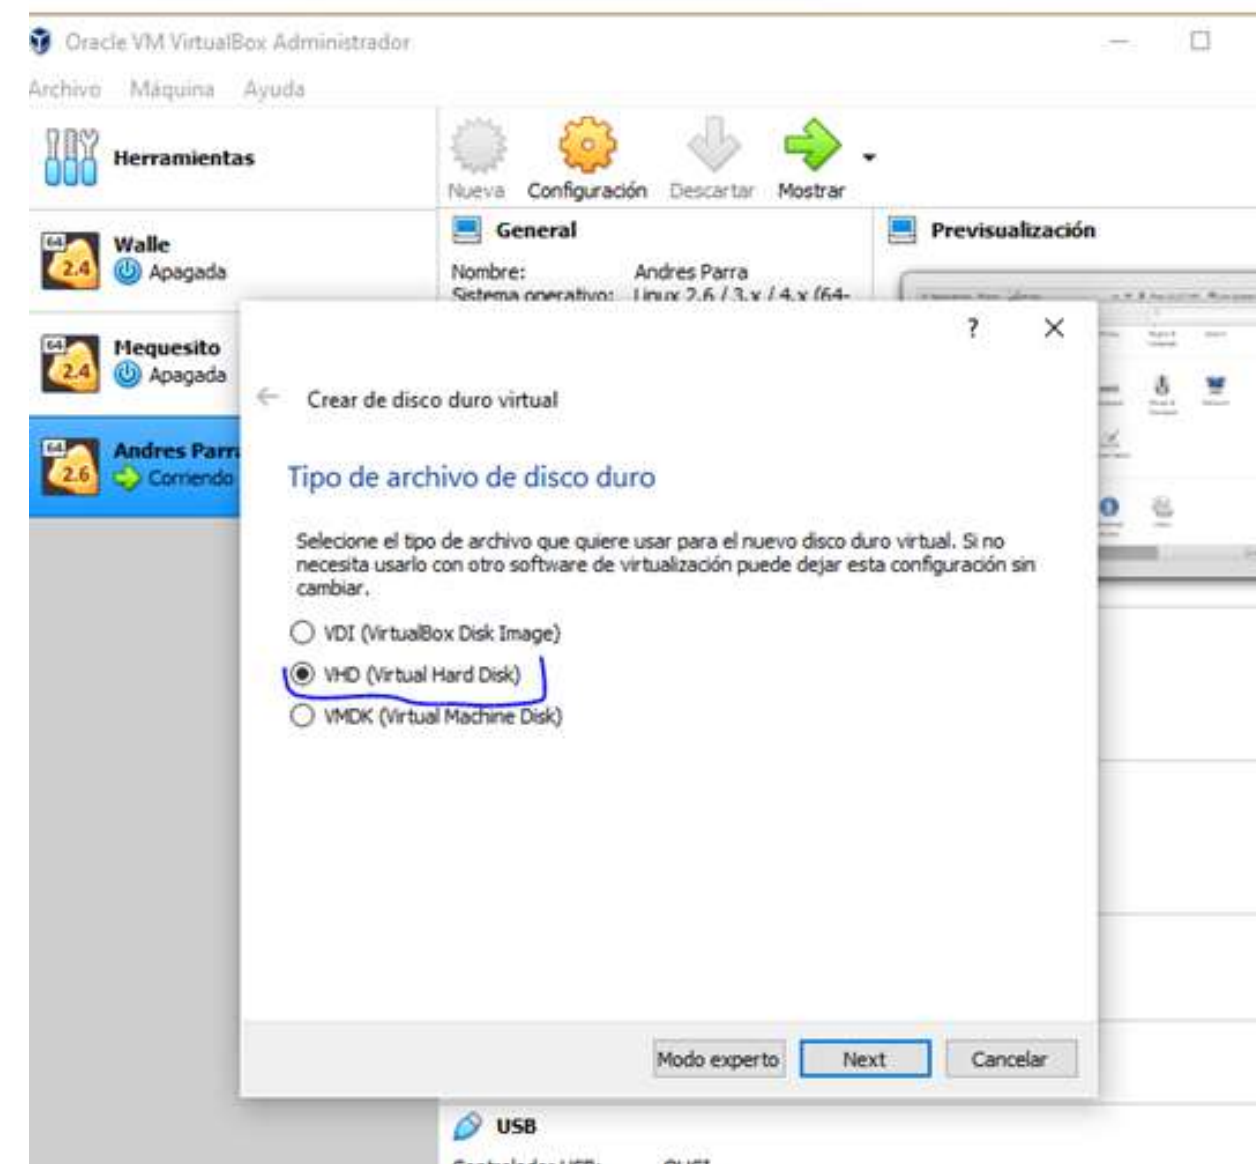

# Escogemos el rango de la RAM soportable

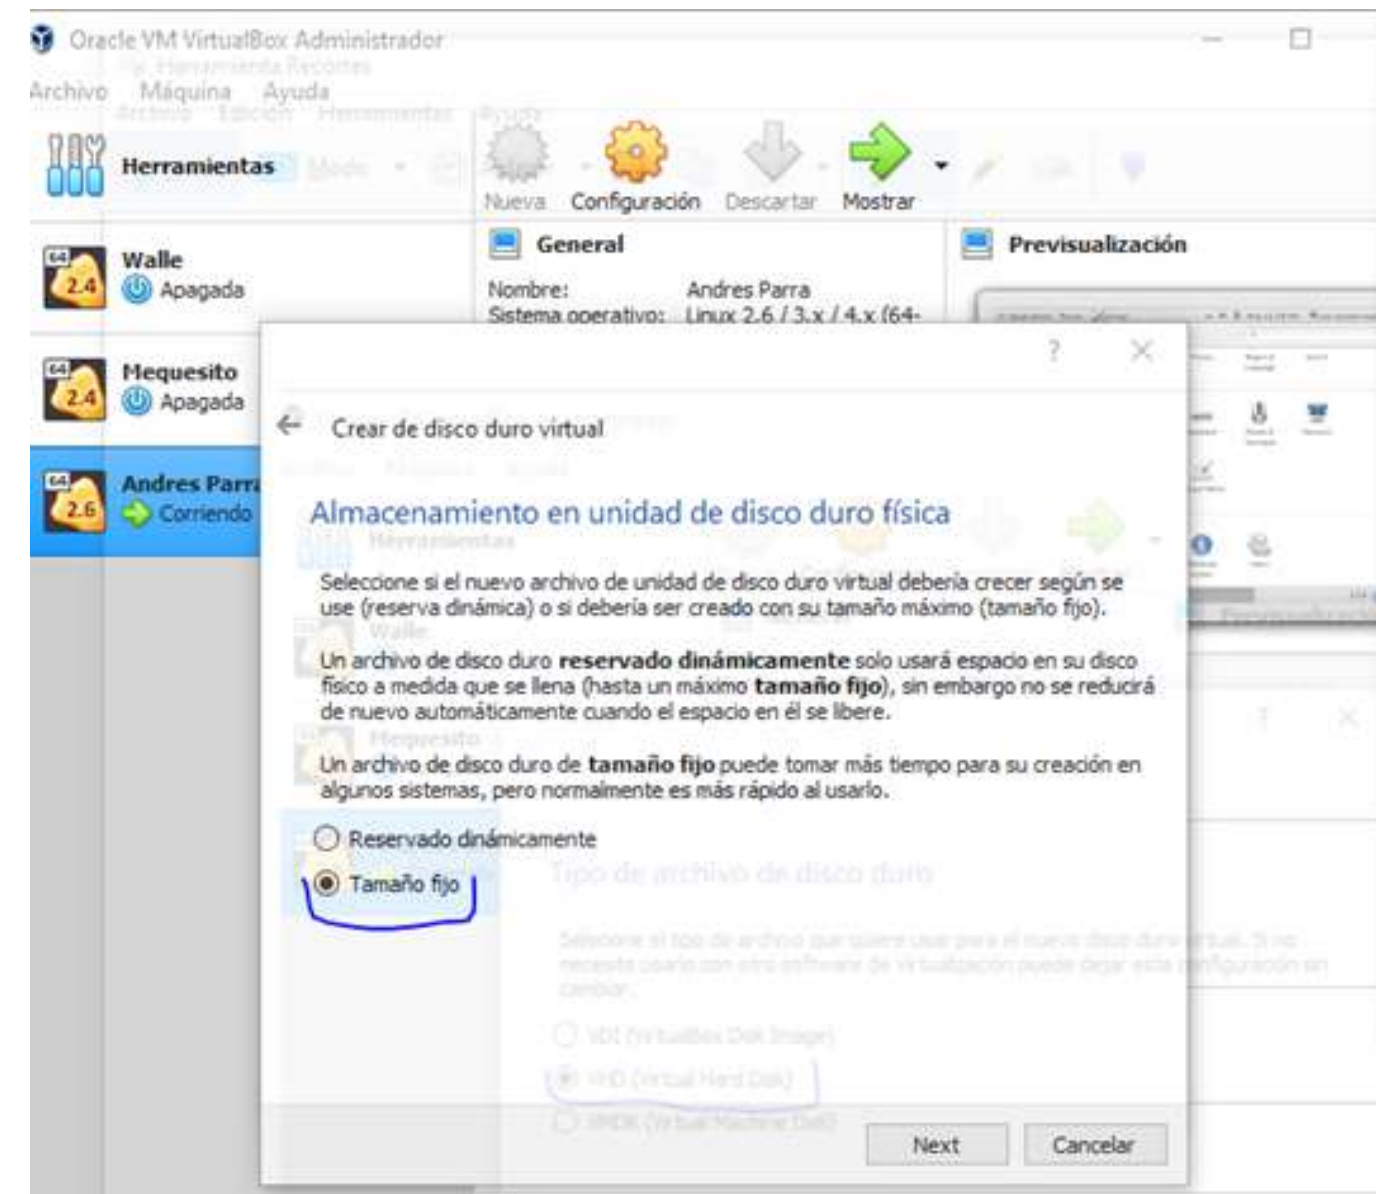

# Marca la opción (Crear un disco duro virtual ahora)

**Le damos  
crear, y  
escogemos la  
opción VHD  
(virtual Hard  
Disk)**

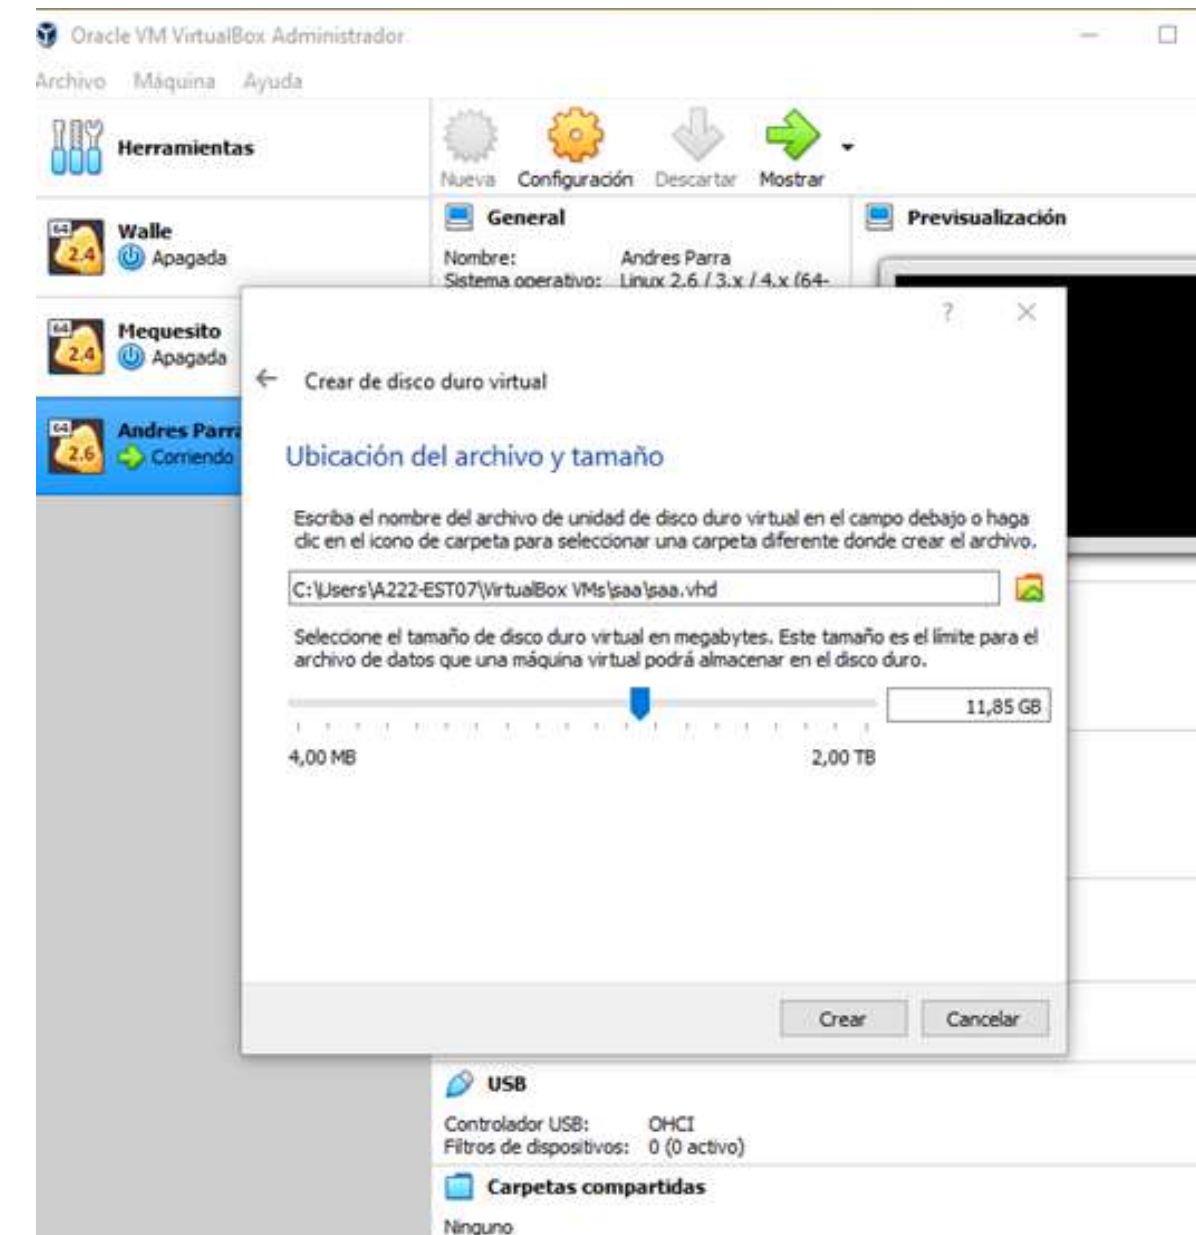

En crear el disco duro virtual escogemos la opción de (Tamaño Fijo)

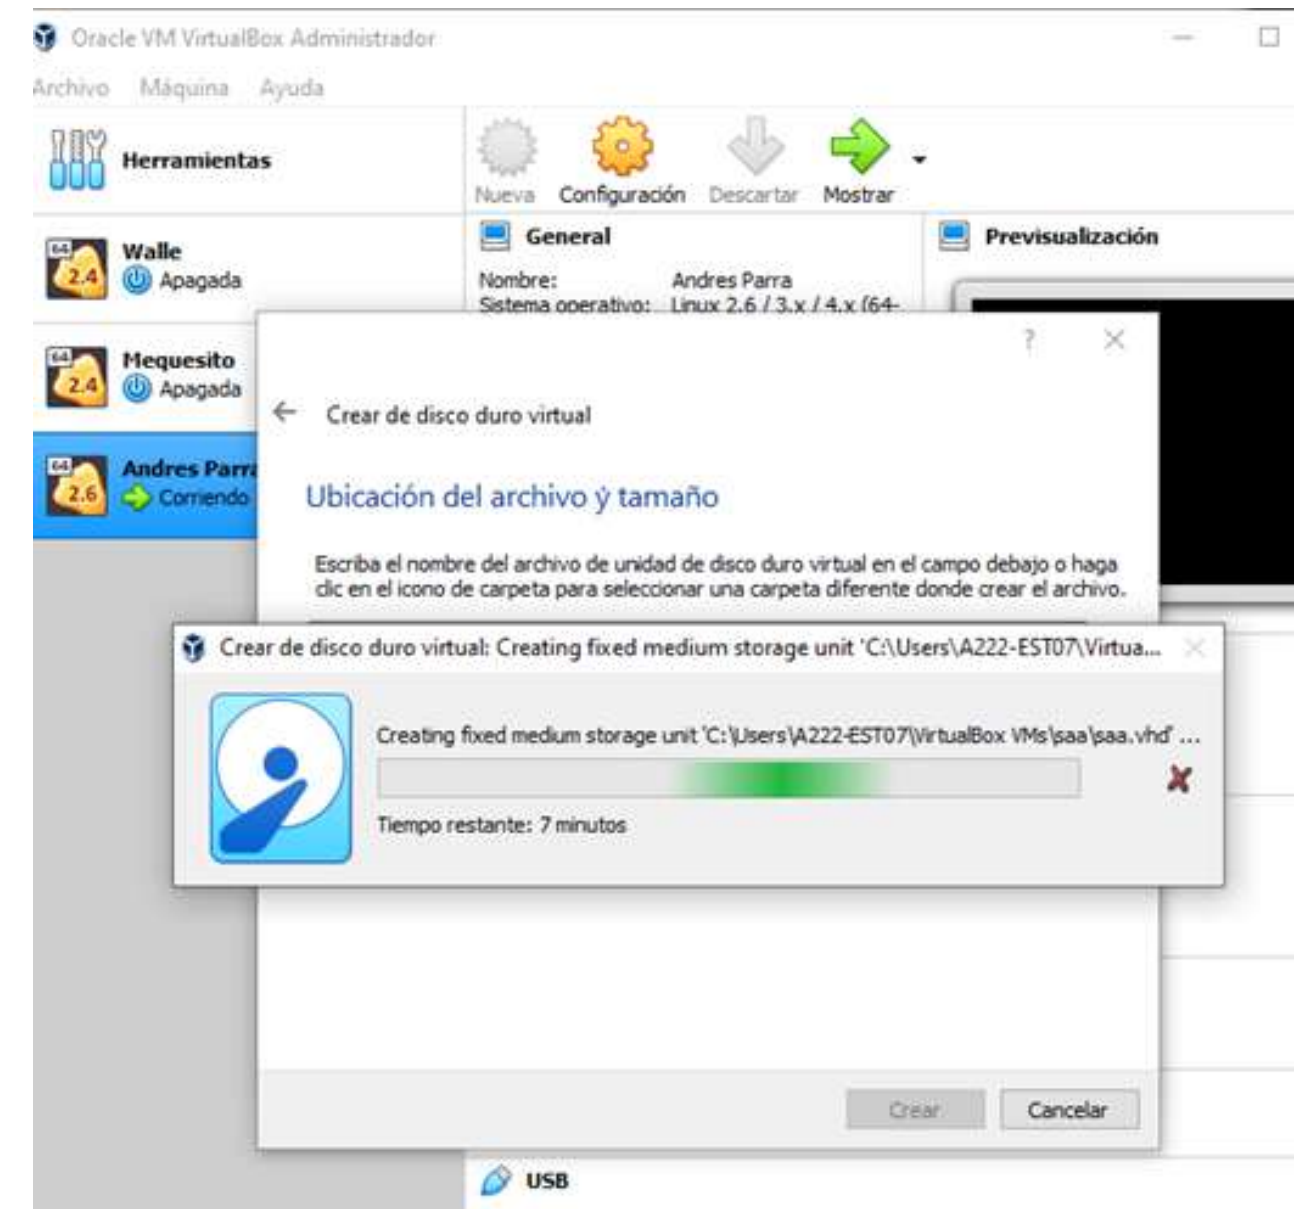

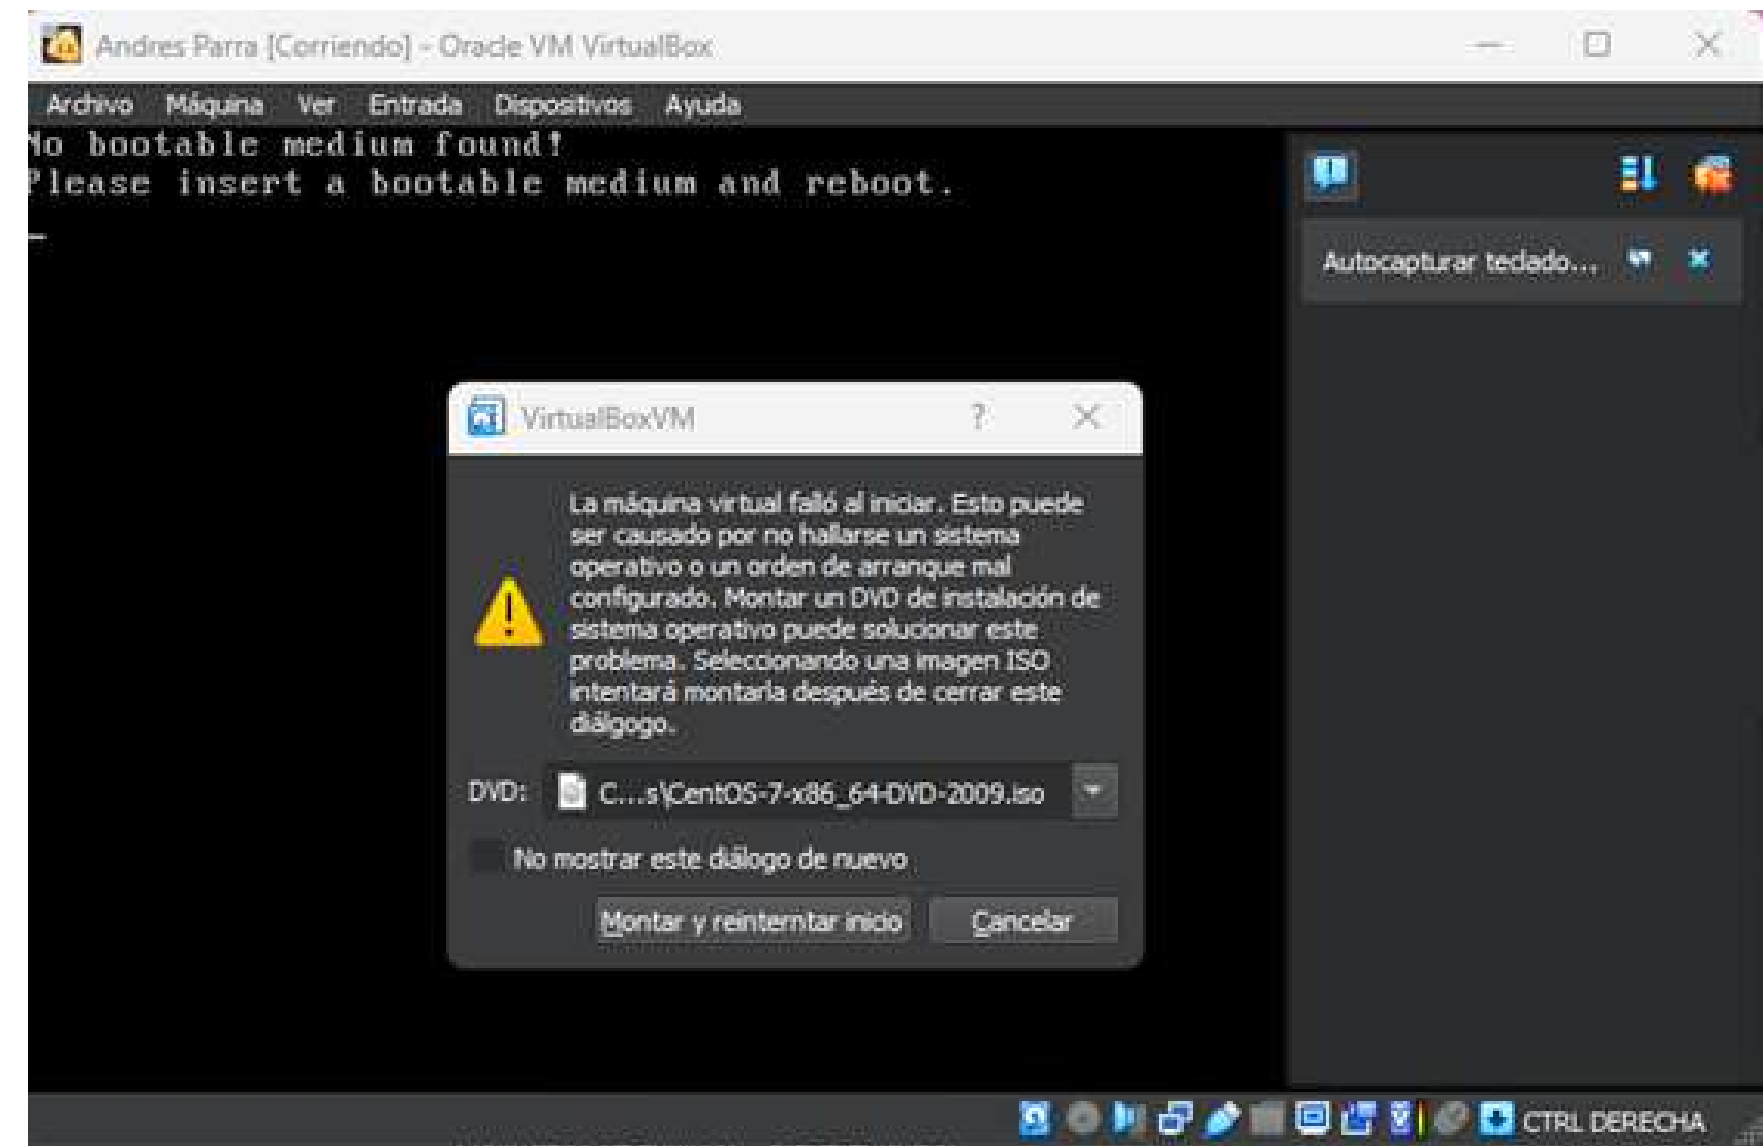

**En la siguiente  
parte  
escogemos un  
rango de 10 a  
15 GB y le  
damos crear**

**Esperamos el  
tiempo  
requerido para  
terminar de  
crear**

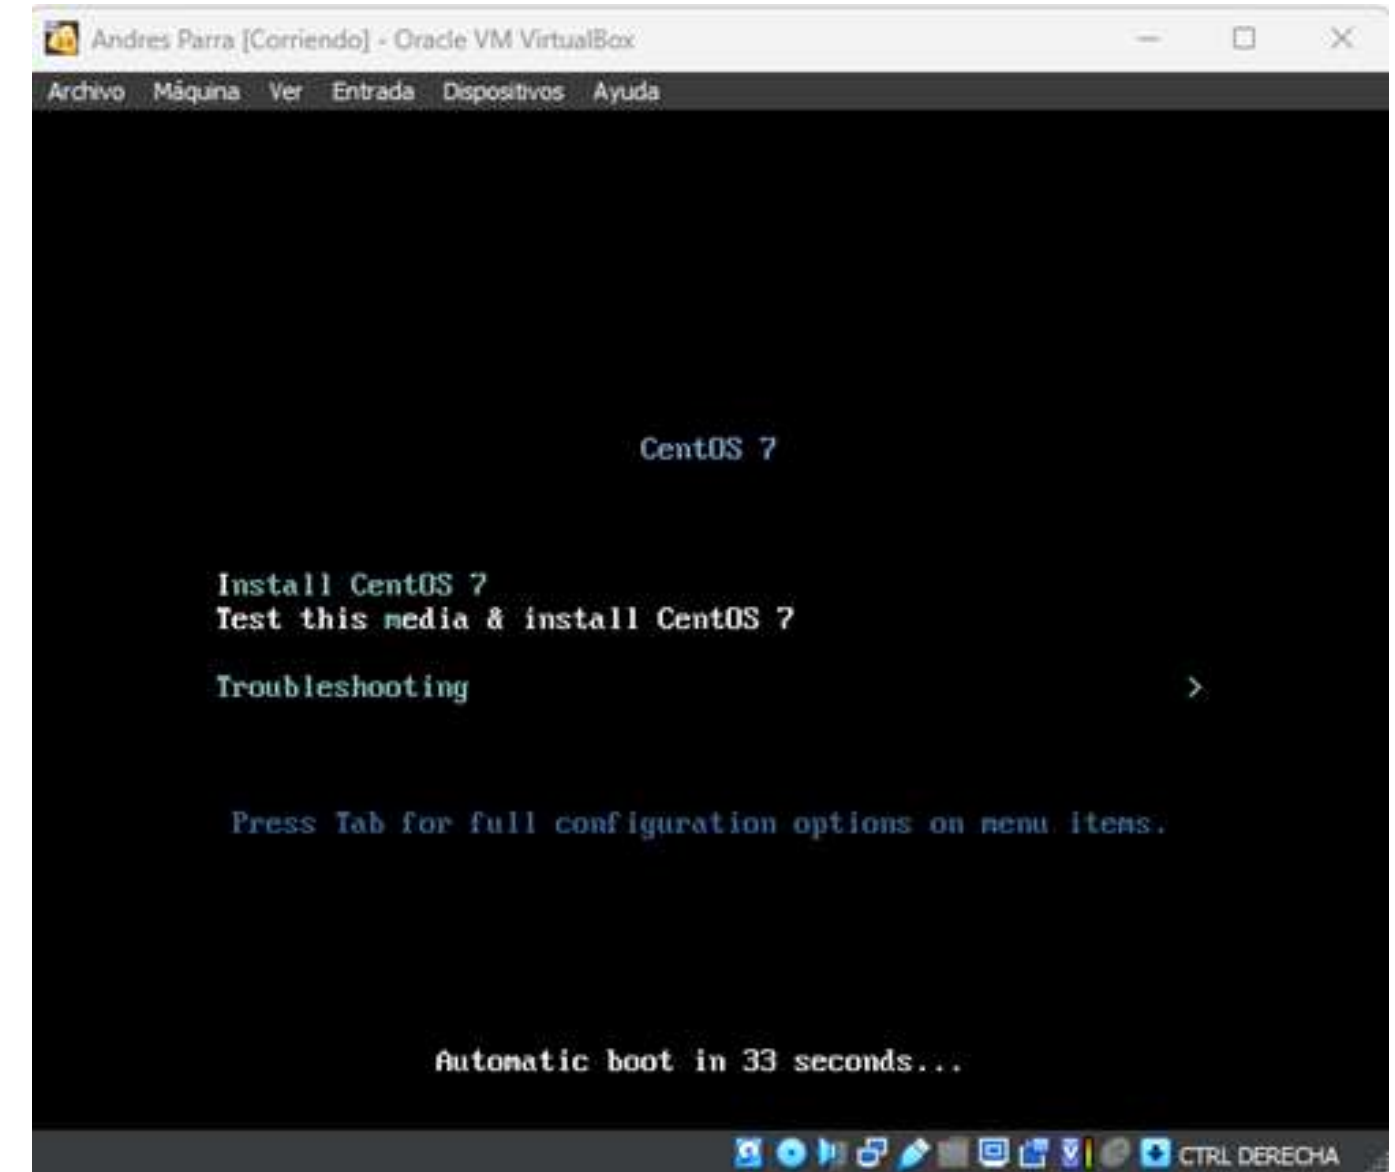

# Luego se monta el ISO de CentOS

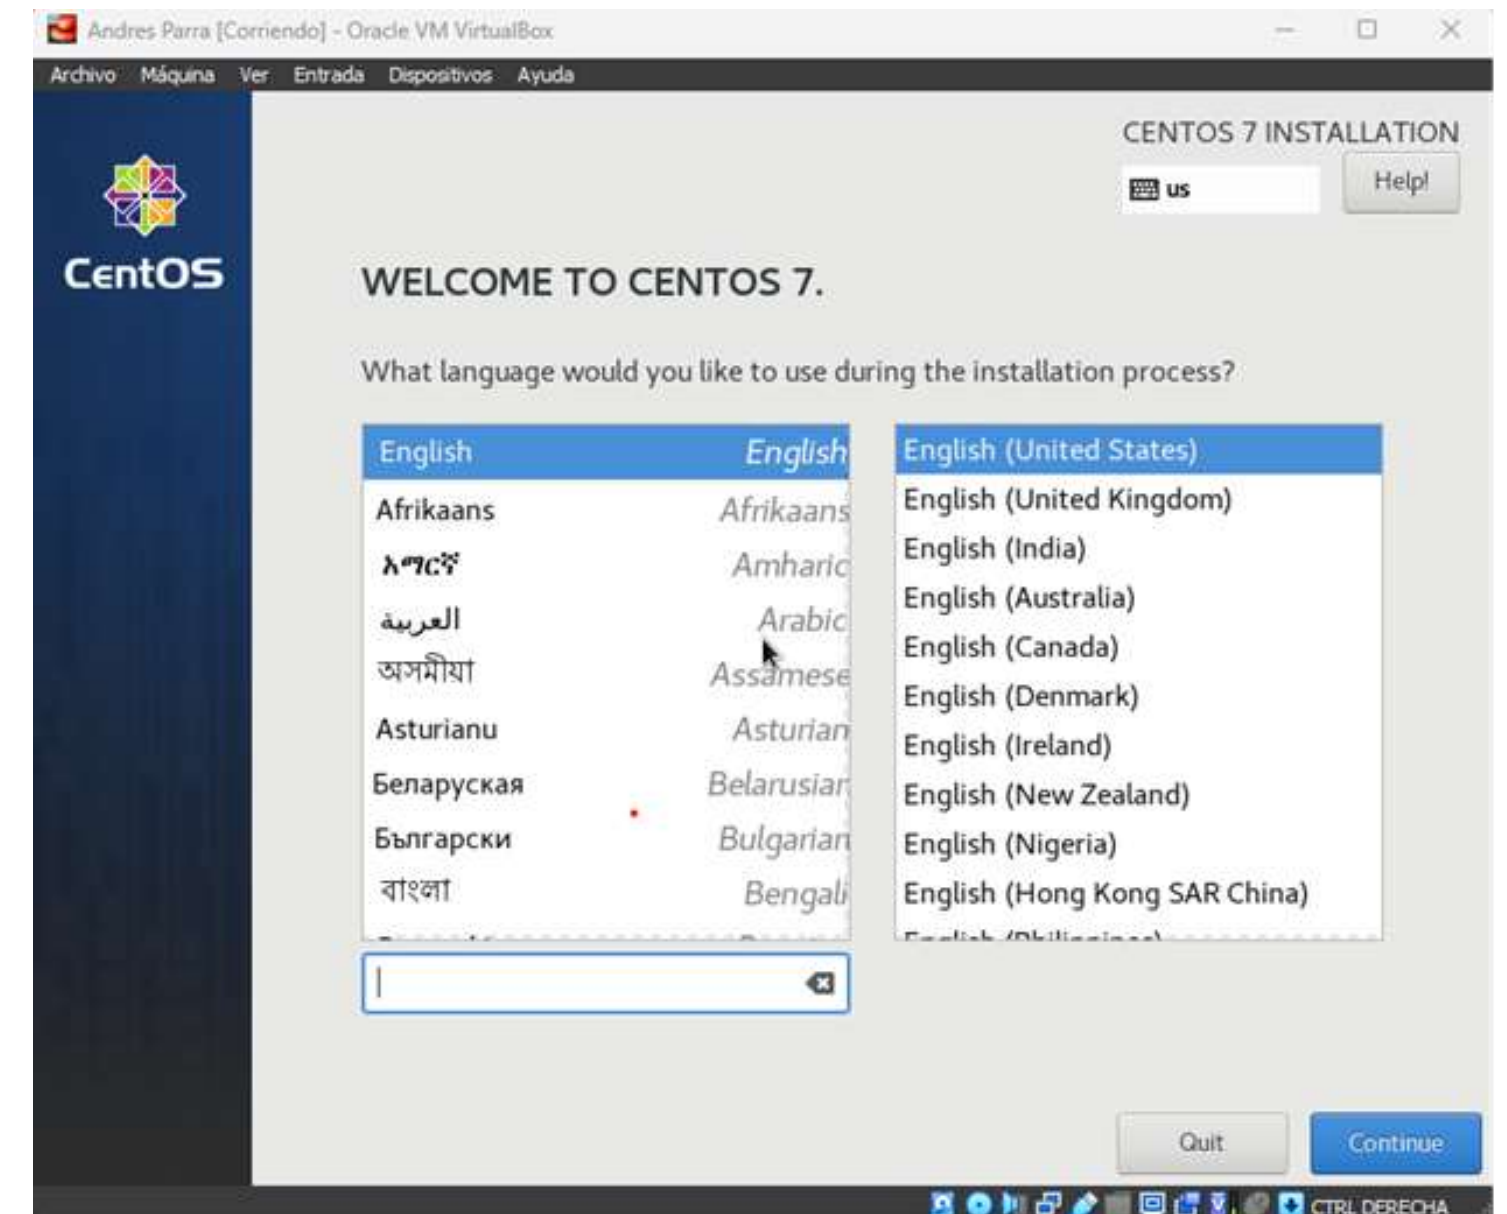

# Y esperar a que inicie el CentOS

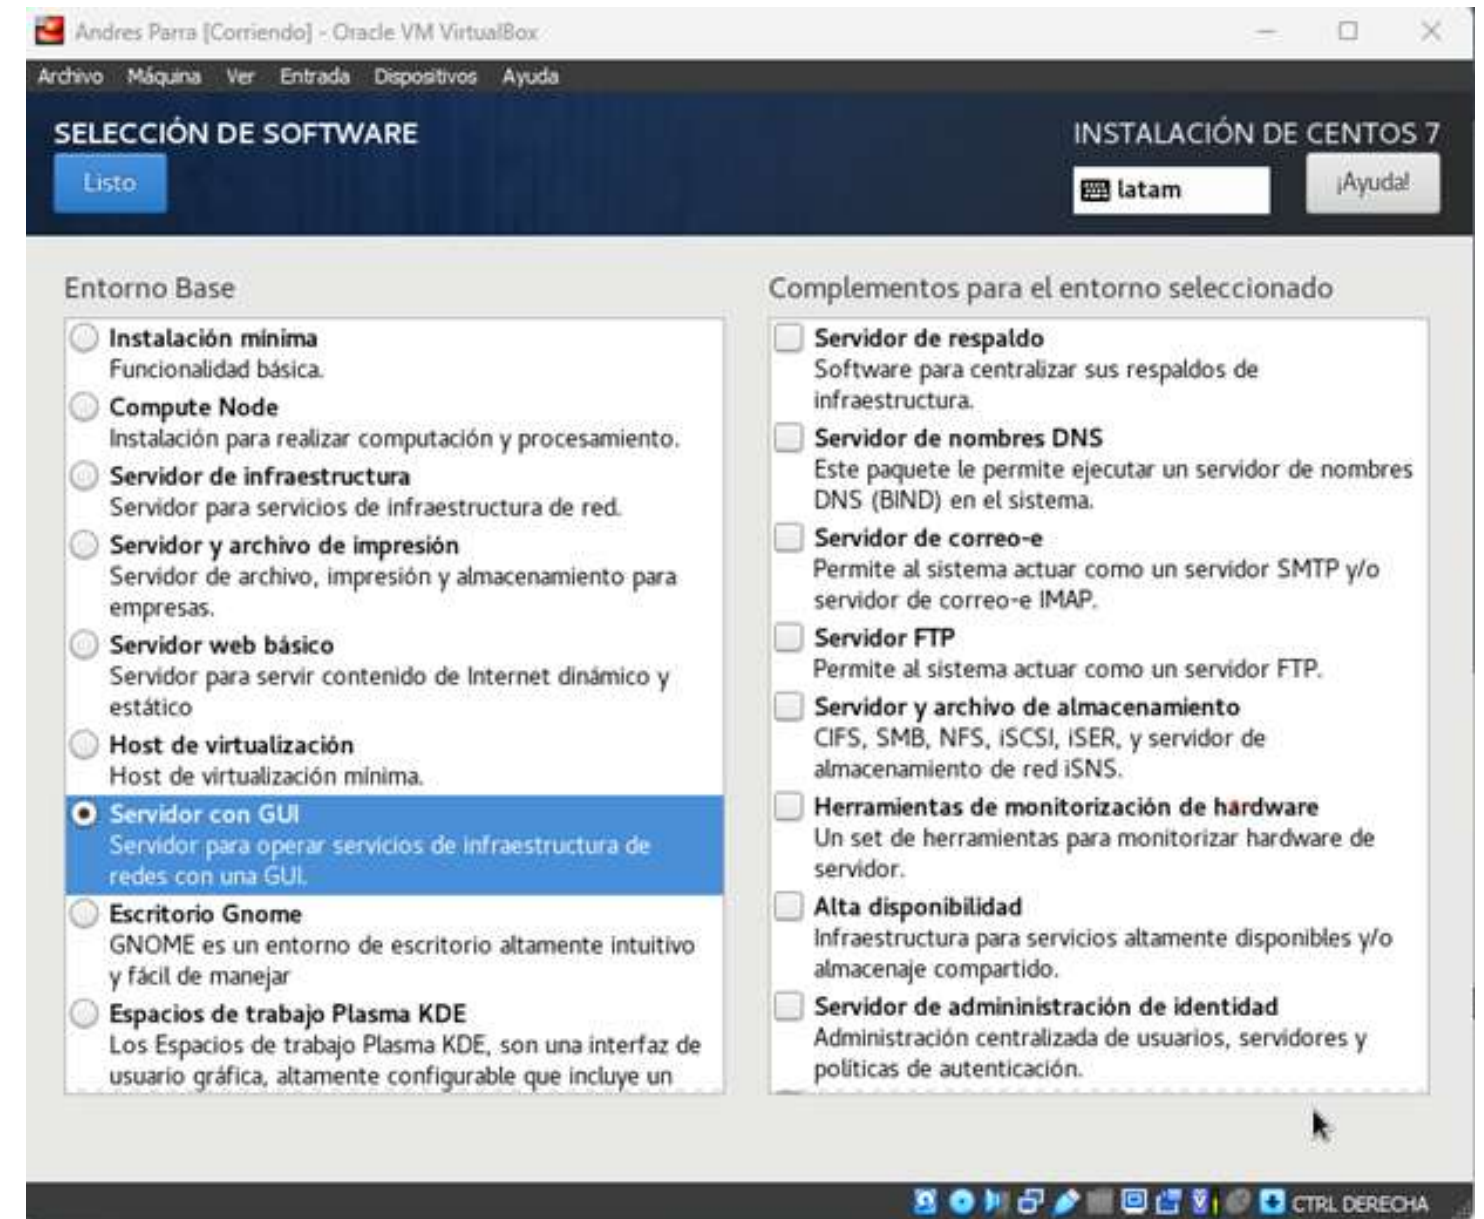

# Seleccionar el idioma

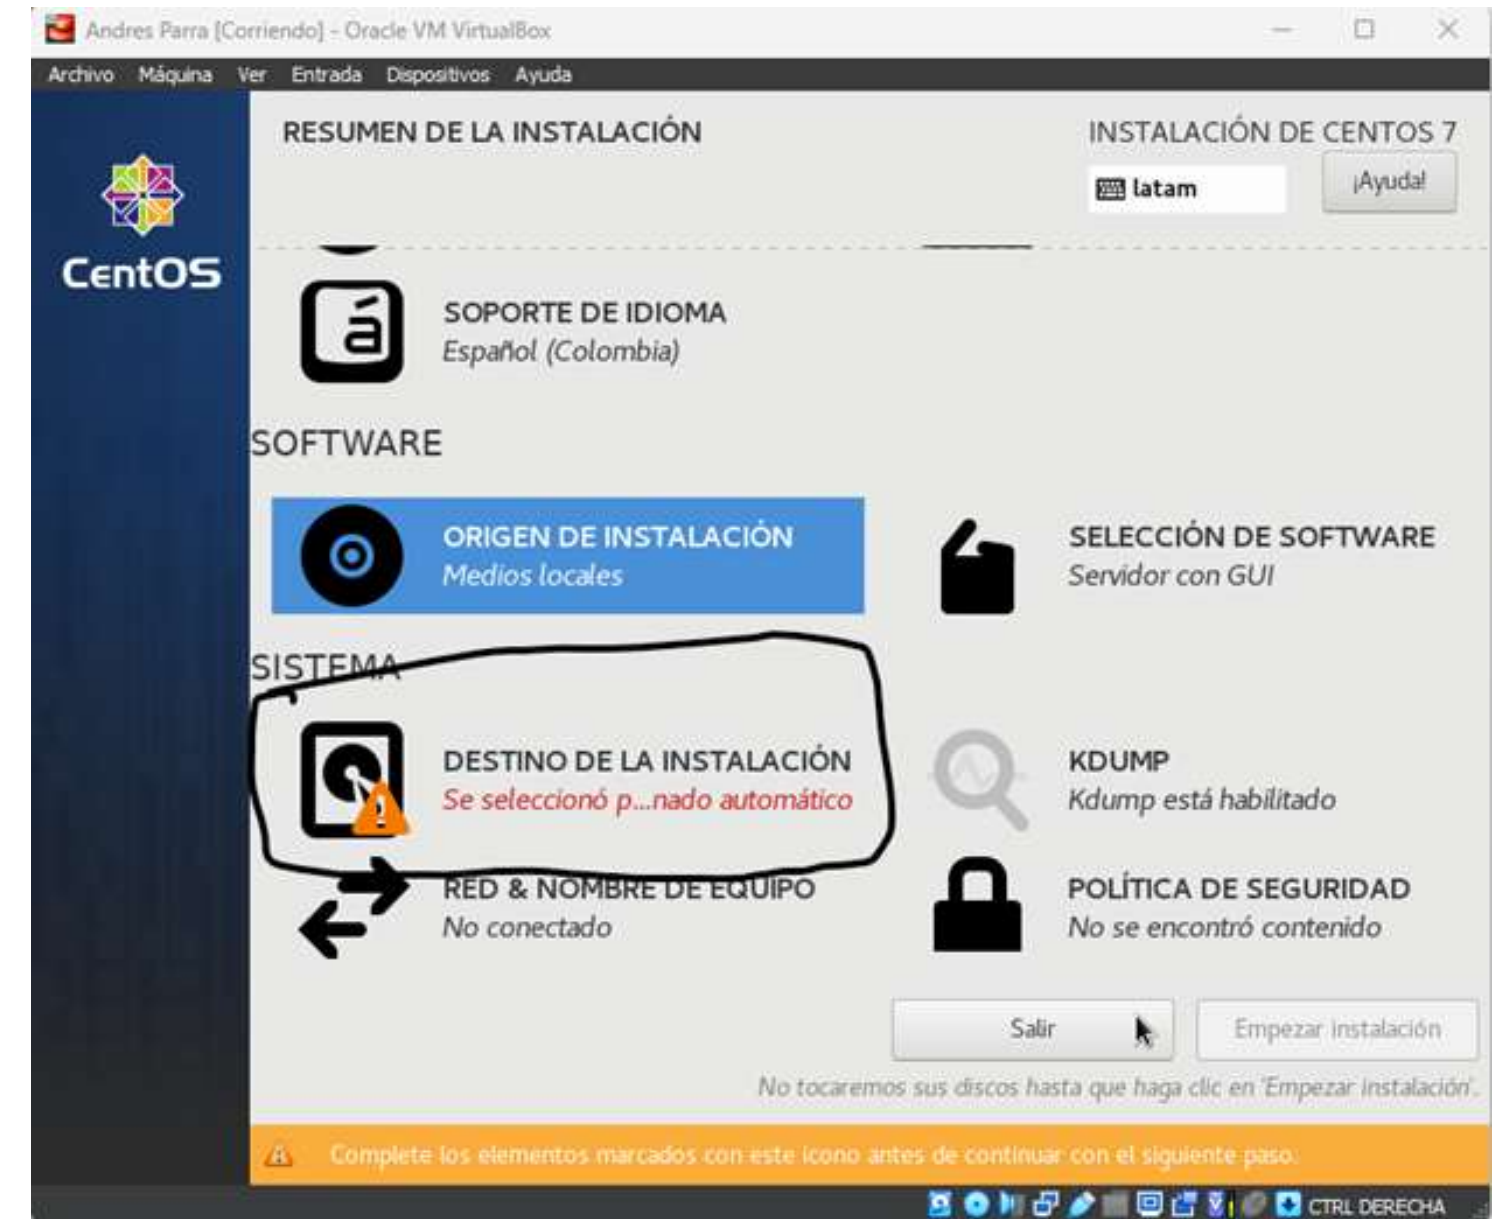

# Entramos al Selección de Software

# Seleccionar el Servidor GUI

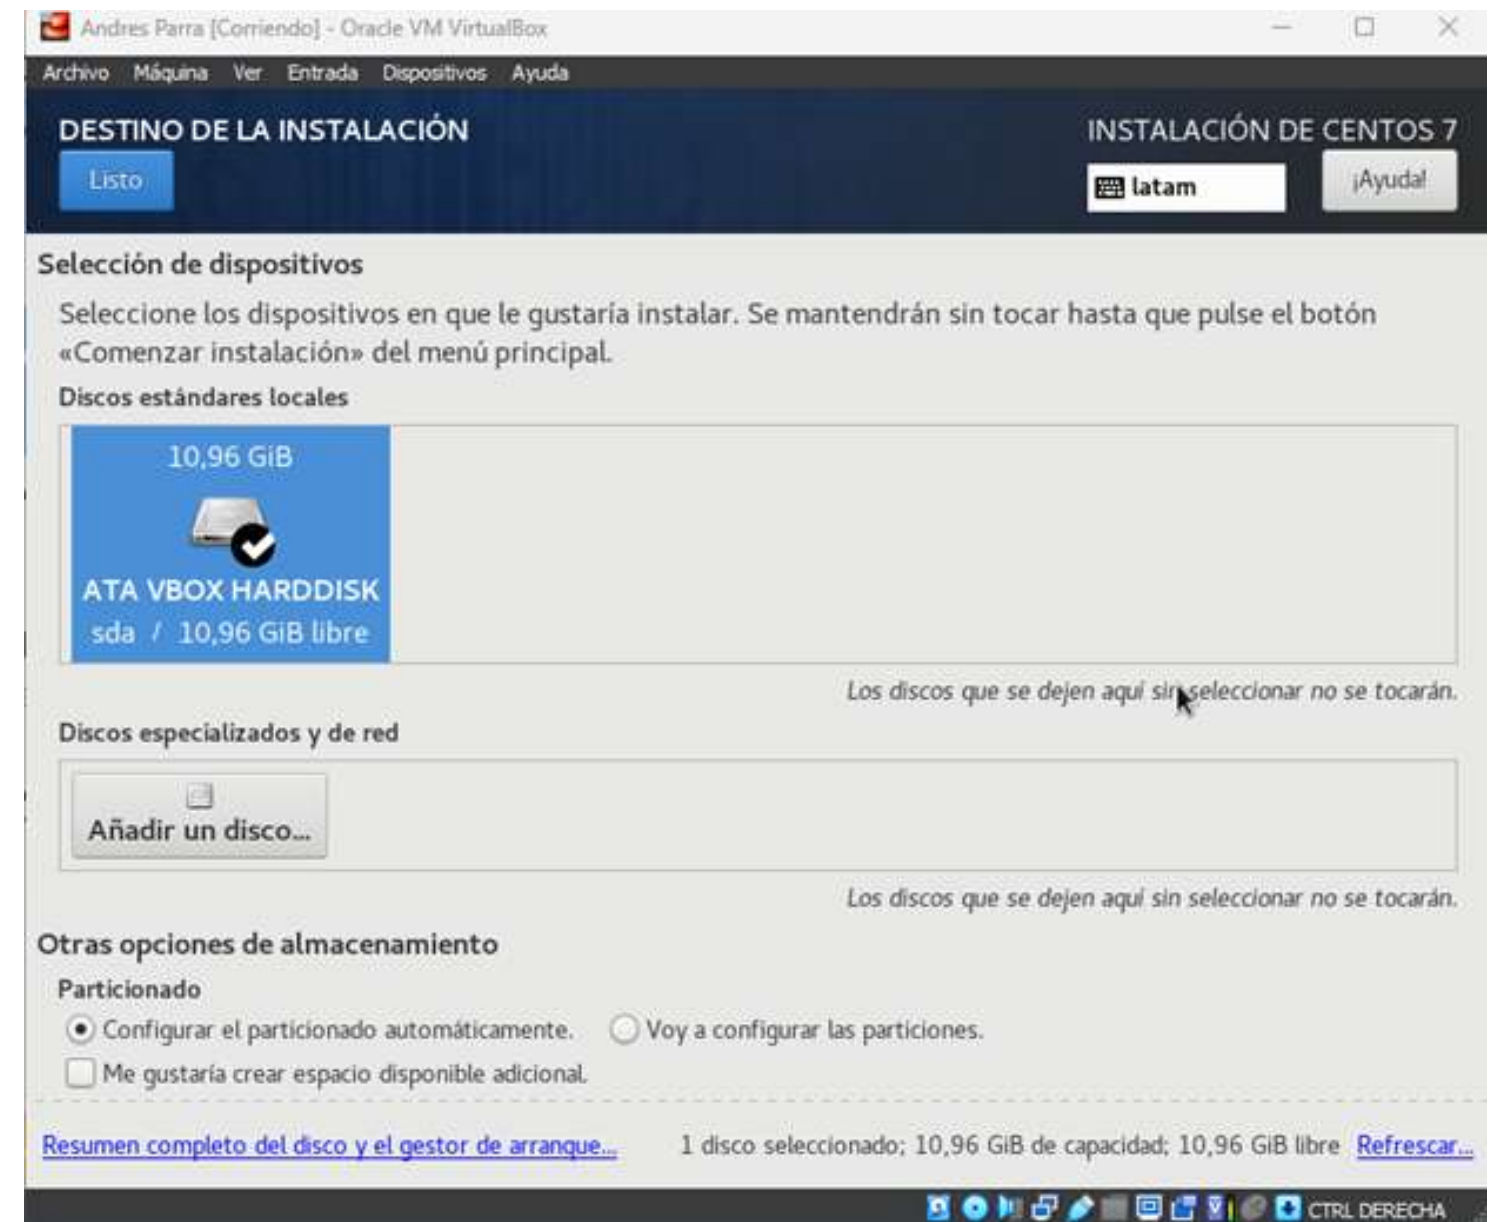

# Seleccionar el Destino de la Instalación

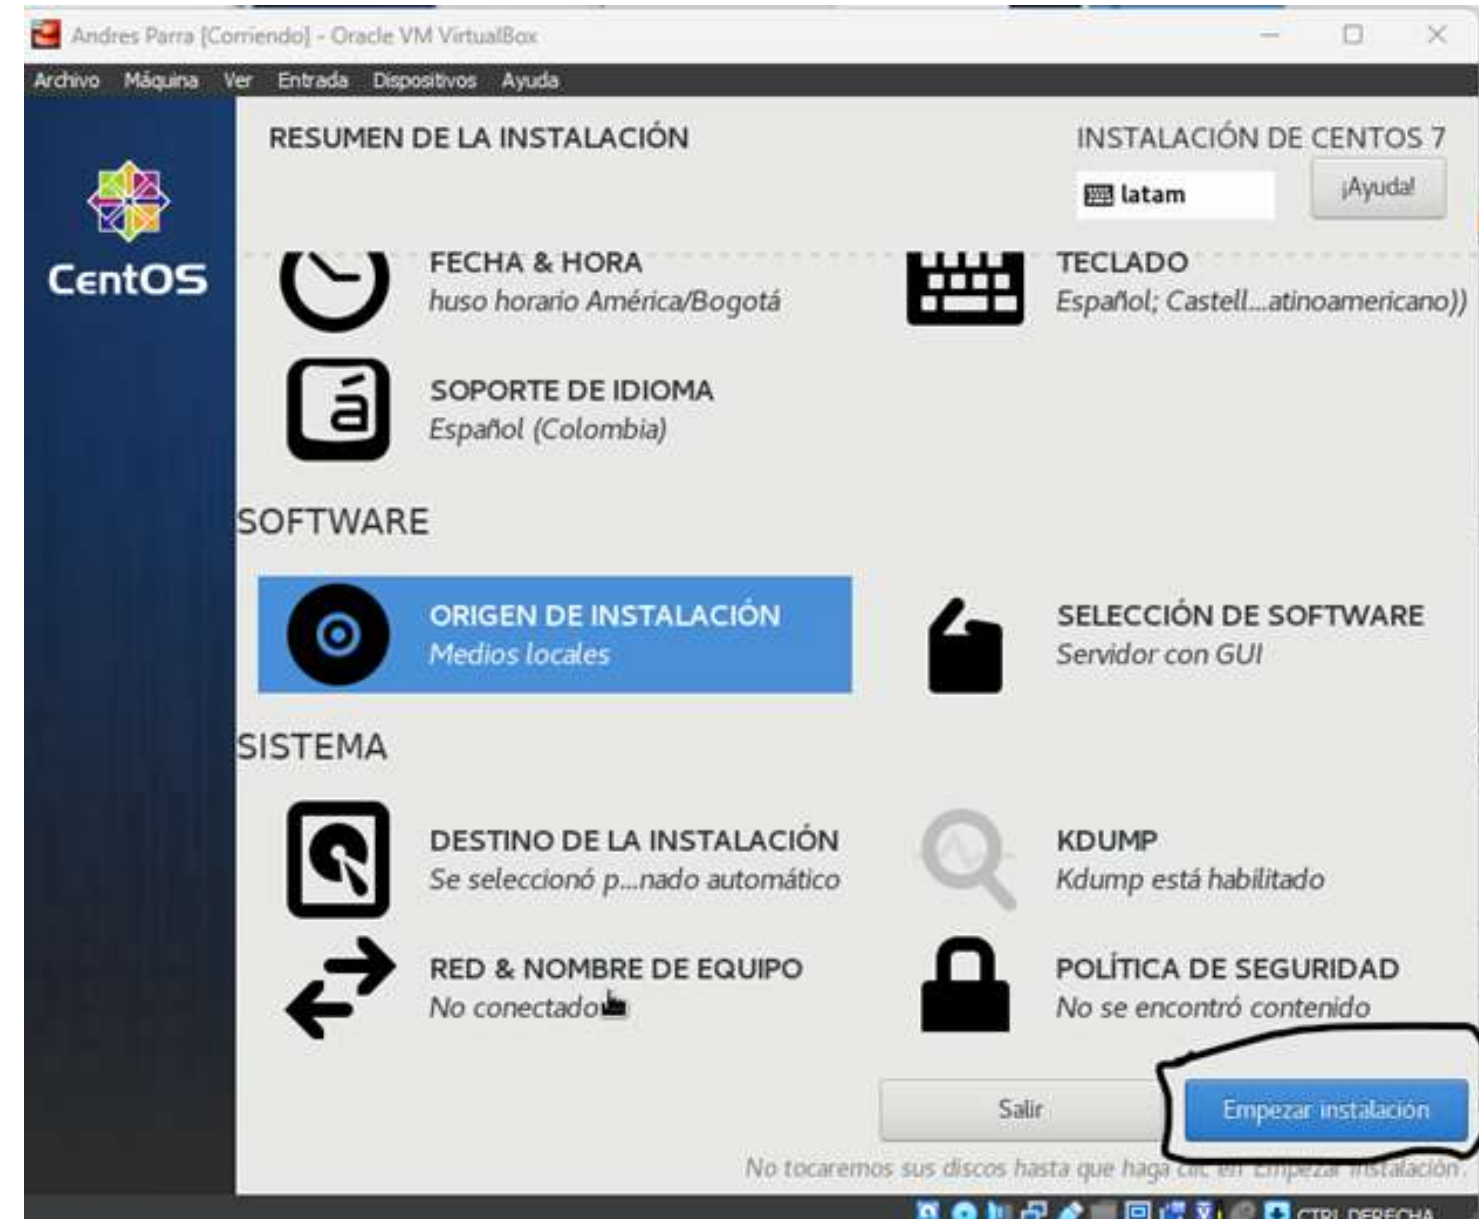

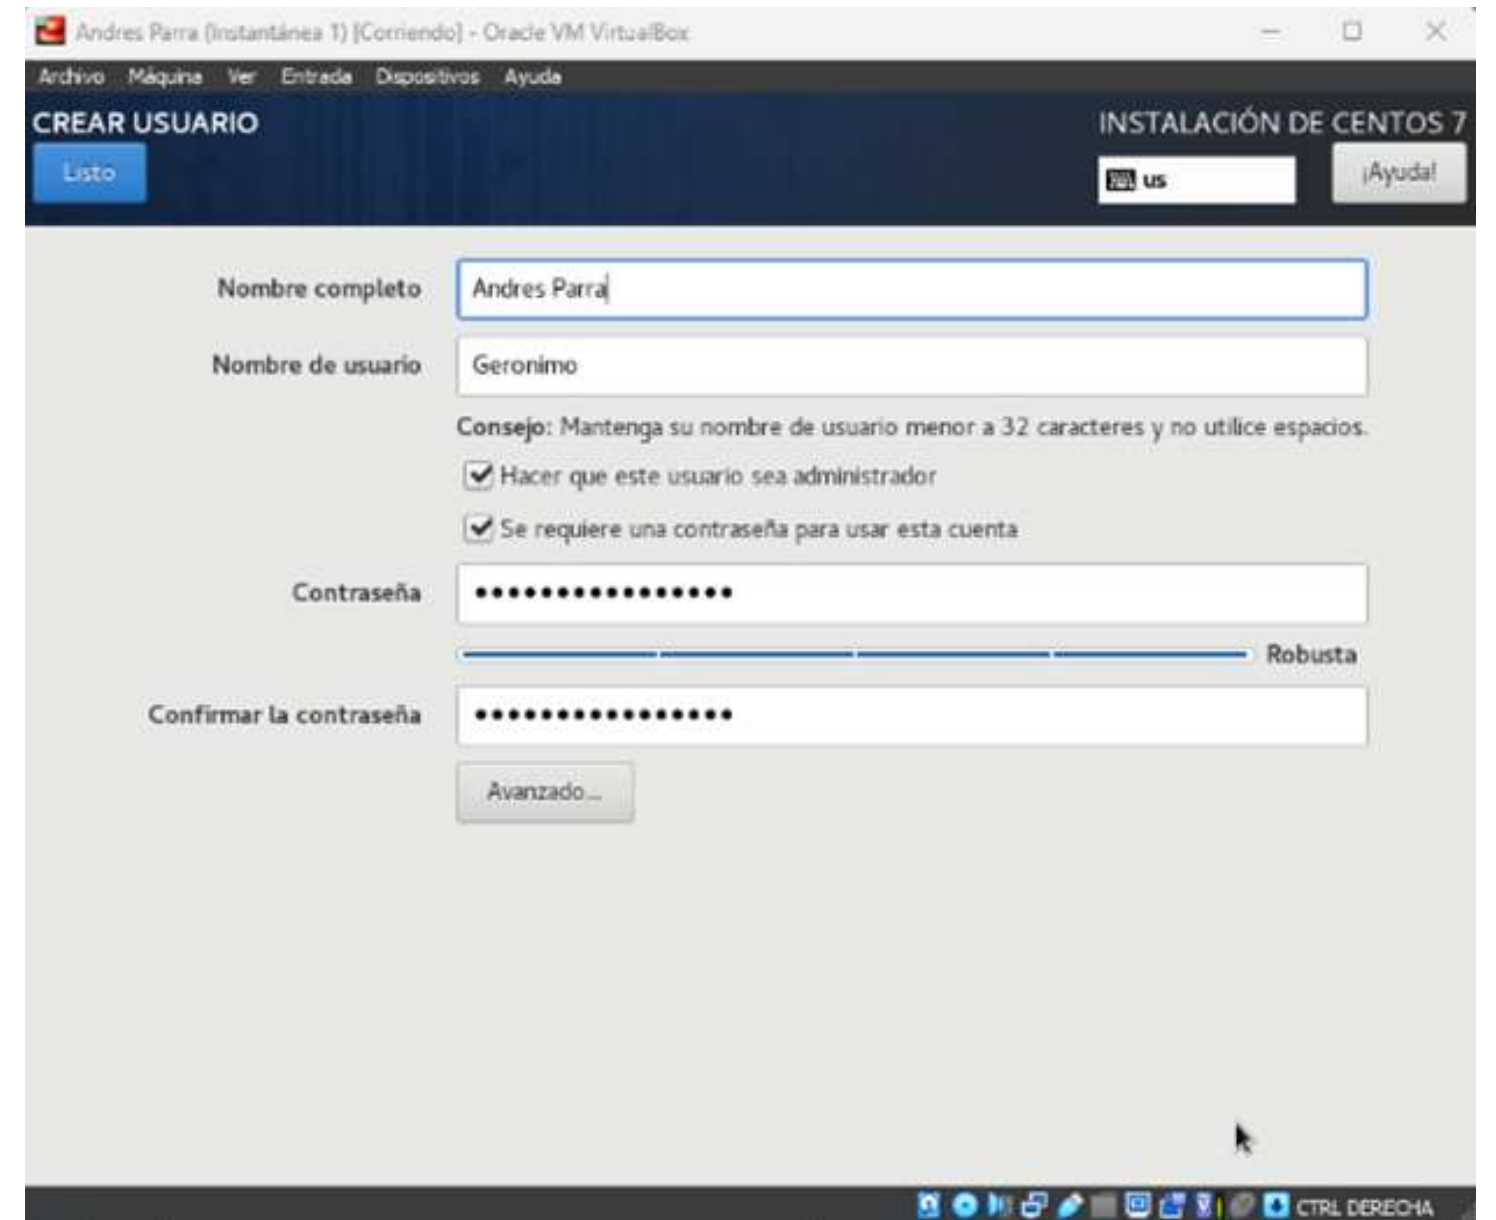

# Se selecciona la unidad de disco

# Le damos después a Empezar instalación

# Creamos un perfil

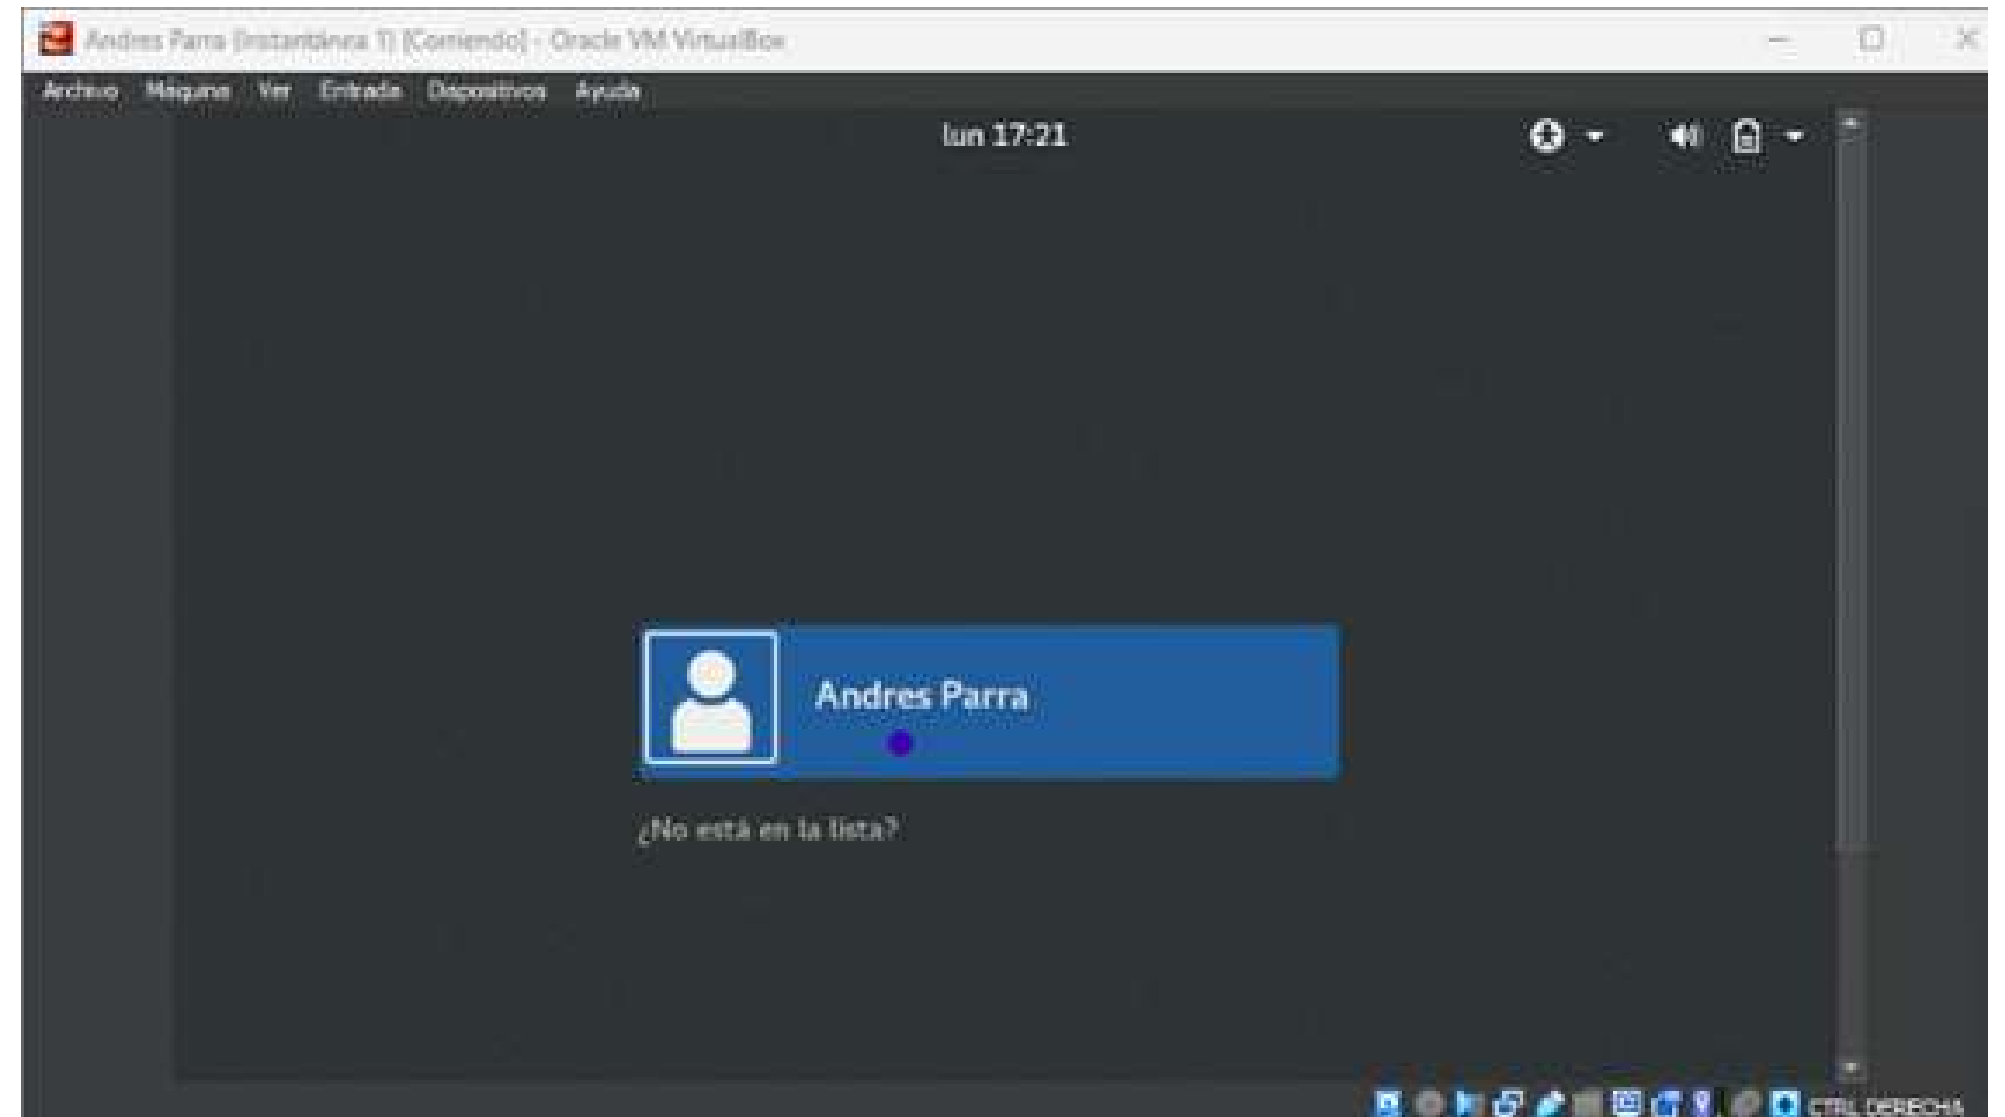

# Le Damos a finalizar configuración

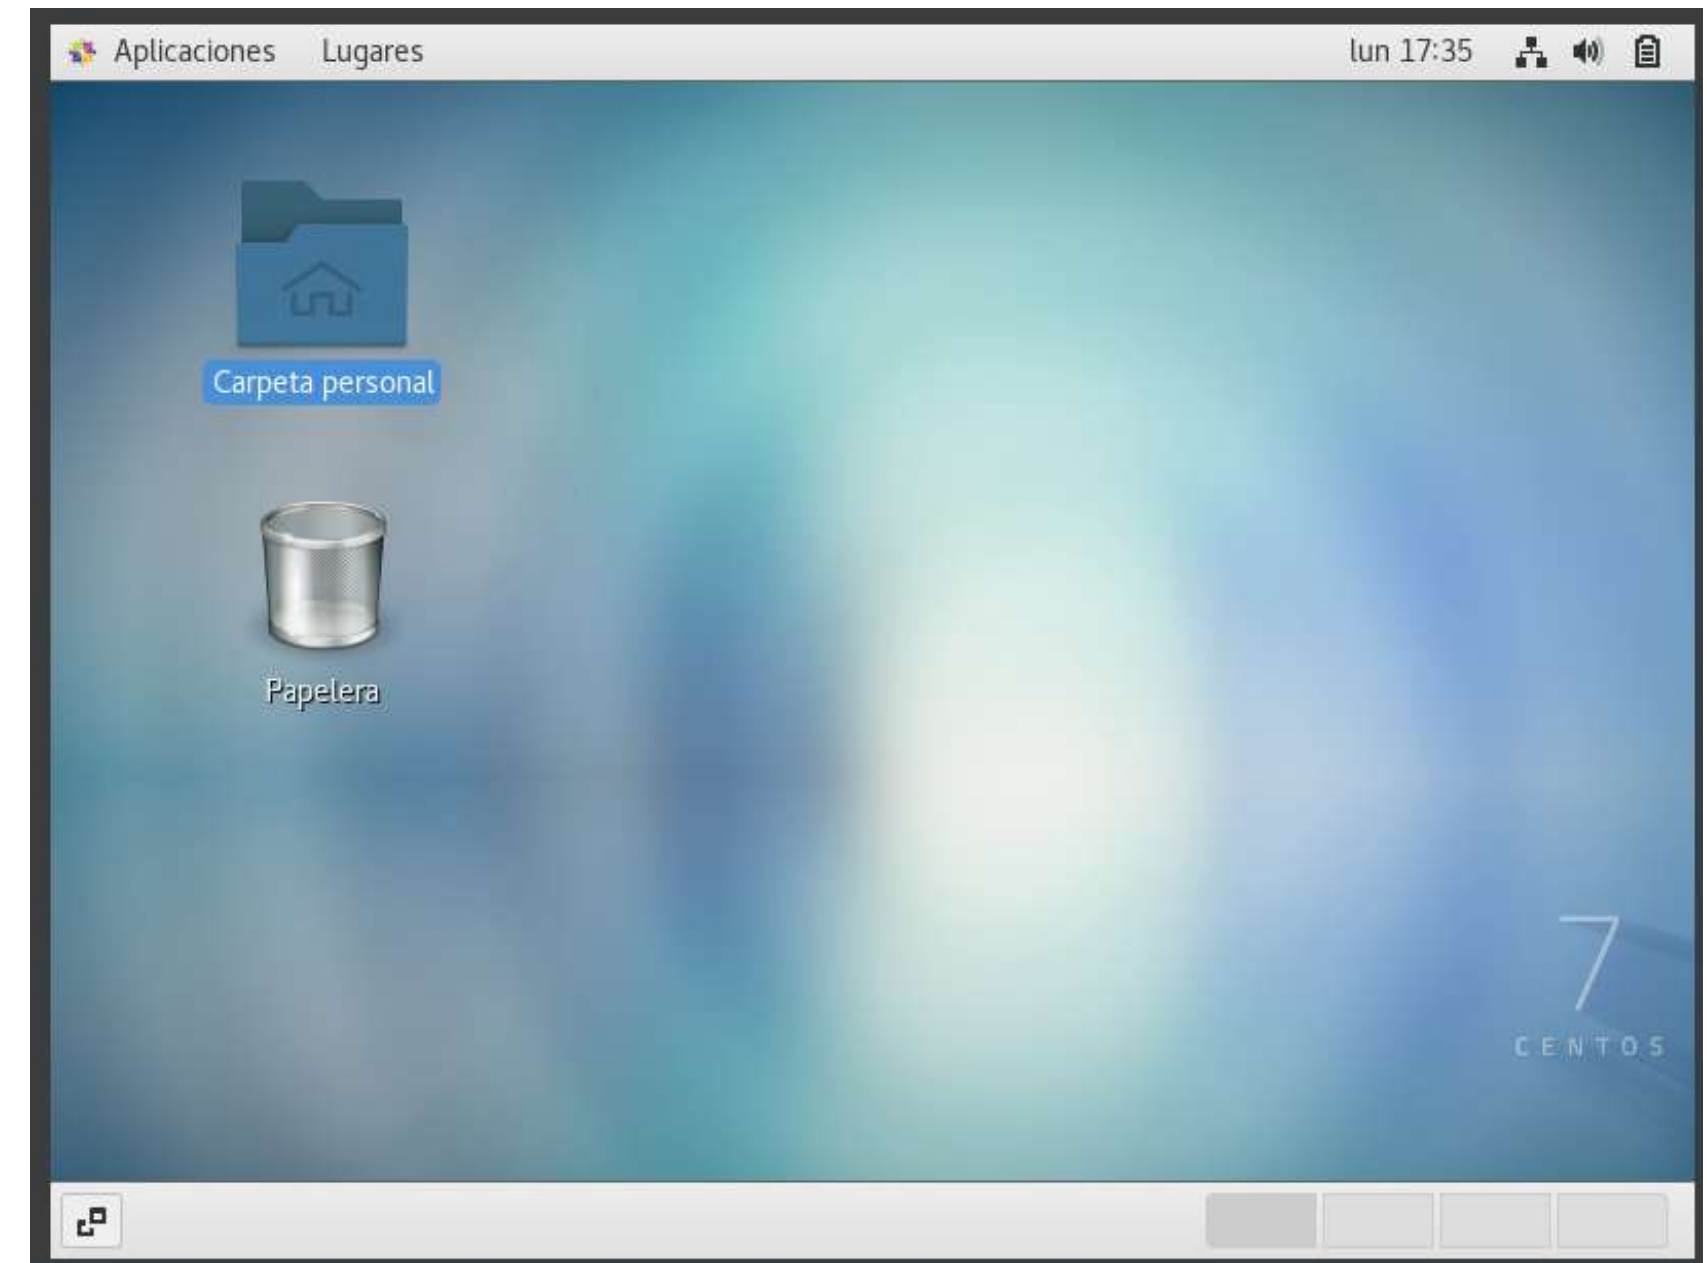

# Le damos a Reiniciar

**Seleccionamos  
el usuario y  
ponemos la  
contraseña**

**Y LISTO YA  
ESTAMOS  
ADENTRO DEL  
SISTEMA  
OPERATIVO  
CENTOS  
LINUX**

**¡Muchas  
gracias!**
